PHASE I ENVIRONMENTAL SITE ASSESSMENT

Quarry Marketplace | Tempe, AZ

Site	Quarry Marketplace
Address	4409 Maple Boulevard, Tempe, AZ 76677
Prepared For	Sunbelt Ridge Acquisitions
Report Date	February 8, 2018
Standard	ASTM E1527-21

Site Description

Access to the site is provided by 41 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Access to the site is provided by 10 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Records Review

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No recognized environmental conditions (RECs) were identified in connection with the subject property. Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 6 blocks to the north is listed as a closed case and is not expected to impact the site. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

No recognized environmental conditions (RECs) were identified in connection with the subject property. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A former dry cleaner located 6 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes.

Access and Utilities

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 29 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 9.9 acres and is generally level with frontage along Maple Boulevard. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 32.32 acres and is generally level with frontage along Maple Boulevard. Access to the site is provided by 46 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Site Description

Access to the site is provided by 3 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 48.48 acres and is generally level with frontage along Maple Boulevard.

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 44.44 acres and is generally level with frontage along Maple Boulevard. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 44 curb cuts and the property is served by municipal water and sanitary sewer.

Records Review

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No recognized environmental conditions (RECs) were identified in connection with the subject property. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 6 blocks to the north is listed as a closed case and is not expected to impact the site. Vapor encroachment screening did not identify a condition requiring further evaluation. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

A former dry cleaner located 5 blocks to the north is listed as a closed case and is not expected to impact the site. Vapor encroachment screening did not identify a condition requiring further evaluation. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. No recognized environmental conditions (RECs) were identified in connection with the subject property. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

Access and Utilities

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 25 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 9.9 acres and is generally level with frontage along Maple Boulevard. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Access to the site is provided by 21 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 22.22 acres and is generally level with frontage along Maple Boulevard. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Findings and Opinions

Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A former dry cleaner located 9 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation.

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A former dry cleaner located 9 blocks to the north is listed as a closed case and is not expected to impact the site. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

Site Reconnaissance

Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.

Historical sources indicate the site was previously used for agricultural and light commercial purposes. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Vapor encroachment screening did not identify a condition requiring further evaluation. No recognized environmental conditions (RECs) were identified in connection with the subject property.

Historical Use

Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 7 blocks to the north is listed as a closed case and is not expected to impact the site. Vapor encroachment screening did not identify a condition requiring further evaluation. No recognized environmental conditions (RECs) were identified in connection with the subject property. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation.

Historical Use

Records Review

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No recognized environmental conditions (RECs) were identified in connection with the subject property. Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 6 blocks to the north is listed as a closed case and is not expected to impact the site.

No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

Findings and Opinions

No recognized environmental conditions (RECs) were identified in connection with the subject property. Vapor encroachment screening did not identify a condition requiring further evaluation. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No recognized environmental conditions (RECs) were identified in connection with the subject property.

Site Reconnaissance

A former dry cleaner located 5 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation.

A former dry cleaner located 3 blocks to the north is listed as a closed case and is not expected to impact the site. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation.

Topography and Flood Zone

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 20.20 acres and is generally level with frontage along Maple Boulevard. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 7 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

The site contains approximately 9.9 acres and is generally level with frontage along Maple Boulevard. Access to the site is provided by 41 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Records Review

Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Access and Utilities

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 18 curb cuts and the property is served by municipal water and sanitary sewer.

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 33 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 16.16 acres and is generally level with frontage along Maple Boulevard. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Historical Use

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 4 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No recognized environmental conditions (RECs) were identified in connection with the subject property. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.
