PHASE I ENVIRONMENTAL SITE ASSESSMENT

Parkview Residences | Atlanta, GA

Site	Parkview Residences
Address	5157 Pioneer Court, Atlanta, GA 18065
Prepared For	Beacon Hollow Investors
Report Date	December 1, 2020
Standard	ASTM E1527-21

Topography and Flood Zone

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 40 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

The site contains approximately 23.23 acres and is generally level with frontage along Pioneer Court. Access to the site is provided by 23 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Findings and Opinions

Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A former dry cleaner located 9 blocks to the north is listed as a closed case and is not expected to impact the site. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A former dry cleaner located 3 blocks to the north is listed as a closed case and is not expected to impact the site. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation.

Site Description

The site contains approximately 25.25 acres and is generally level with frontage along Pioneer Court. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 5.5 acres and is generally level with frontage along Pioneer Court. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Records Review

No recognized environmental conditions (RECs) were identified in connection with the subject property. A former dry cleaner located 6 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 8 blocks to the north is listed as a closed case and is not expected to impact the site. Vapor encroachment screening did not identify a condition requiring further evaluation.

Topography and Flood Zone

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 25 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 7.7 acres and is generally level with frontage along Pioneer Court. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 37 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Findings and Opinions

No recognized environmental conditions (RECs) were identified in connection with the subject property. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Vapor encroachment screening did not identify a condition requiring further evaluation. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

No recognized environmental conditions (RECs) were identified in connection with the subject property.

Topography and Flood Zone

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 40.40 acres and is generally level with frontage along Pioneer Court. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 2 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 14.14 acres and is generally level with frontage along Pioneer Court. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Site Reconnaissance

No recognized environmental conditions (RECs) were identified in connection with the subject property. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. A former dry cleaner located 7 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 5 blocks to the north is listed as a closed case and is not expected to impact the site.

Records Review

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A former dry cleaner located 4 blocks to the north is listed as a closed case and is not expected to impact the site. Vapor encroachment screening did not identify a condition requiring further evaluation. No recognized environmental conditions (RECs) were identified in connection with the subject property.

Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Vapor encroachment screening did not identify a condition requiring further evaluation. No recognized environmental conditions (RECs) were identified in connection with the subject property. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A former dry cleaner located 2 blocks to the north is listed as a closed case and is not expected to impact the site. Historical sources indicate the site was previously used for agricultural and light commercial purposes.

Historical Use

Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation. No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

A former dry cleaner located 8 blocks to the north is listed as a closed case and is not expected to impact the site. No recognized environmental conditions (RECs) were identified in connection with the subject property. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Topography and Flood Zone

Access to the site is provided by 17 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 16.16 acres and is generally level with frontage along Pioneer Court.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 20.20 acres and is generally level with frontage along Pioneer Court. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Findings and Opinions

Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 3 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

No recognized environmental conditions (RECs) were identified in connection with the subject property. Vapor encroachment screening did not identify a condition requiring further evaluation. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

Topography and Flood Zone

The site contains approximately 22.22 acres and is generally level with frontage along Pioneer Court. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 37 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

The site contains approximately 28.28 acres and is generally level with frontage along Pioneer Court. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 5 curb cuts and the property is served by municipal water and sanitary sewer.

Records Review

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 9 blocks to the north is listed as a closed case and is not expected to impact the site. No recognized environmental conditions (RECs) were identified in connection with the subject property. Historical sources indicate the site was previously used for agricultural and light commercial purposes.
