APPRAISAL REPORT

Canyon Saddlebrook Data Campus | Pittsburgh, PA

Subject Property	Canyon Saddlebrook Data Campus
Address	4766 Sunset Drive, Pittsburgh, PA 79909
Property Rights Appraised	Fee Simple
Effective Date of Value	January 14, 2024
Market Value Conclusion	$425,020,000

Demographics and Employment

Carrier-neutral meet-me room supports multiple fiber providers. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 2.7% population growth over the last five years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Market vacancy for comparable Data Center product stands at 4.8%, down from 4.2% two years ago.

The Pittsburgh Data Center market has experienced absorption of 1700 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Median household income within a 6-mile radius of the property is approximately $141,000 and has grown 12.9% annually. Market vacancy for comparable Data Center product stands at 12.4%, down from 4.6% two years ago. Carrier-neutral meet-me room supports multiple fiber providers.

Topography and Flood Zone

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 24.24 acres and is generally level with frontage along Sunset Drive. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 29 curb cuts and the property is served by municipal water and sanitary sewer.

The site contains approximately 12.12 acres and is generally level with frontage along Sunset Drive. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 5 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Demographics and Employment

Median household income within a 1-mile radius of the property is approximately $100,000 and has grown 2.2% annually. Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 7.00% and 7.00%. Employment growth is led by healthcare, logistics, education and professional services sectors. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 8.0% population growth over the last five years.

Carrier-neutral meet-me room supports multiple fiber providers. Rent growth in the submarket has averaged 5.0% annually over the past 9 years. The Pittsburgh Data Center market has experienced absorption of 800 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 2.5% population growth over the last five years. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Employment growth is led by healthcare, logistics, education and professional services sectors.

Demographics and Employment

Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 7.05% and 7.05%. The Pittsburgh Data Center market has experienced absorption of 2800 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Market vacancy for comparable Data Center product stands at 3.4%, down from 3.1% two years ago. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 4.4% population growth over the last five years. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Median household income within a 4-mile radius of the property is approximately $387,000 and has grown 8.2% annually. Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 11 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 5.62% and 5.62%.

Access and Utilities

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 42 curb cuts and the property is served by municipal water and sanitary sewer.

Access to the site is provided by 17 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 17.17 acres and is generally level with frontage along Sunset Drive.

Demographics and Employment

Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 7.02% and 7.02%. The Pittsburgh Data Center market has experienced absorption of 2900 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Market vacancy for comparable Data Center product stands at 8.9%, down from 7.4% two years ago. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 12.7% population growth over the last five years. Median household income within a 8-mile radius of the property is approximately $301,000 and has grown 5.0% annually.

Market vacancy for comparable Data Center product stands at 2.7%, down from 6.5% two years ago. The facility is a purpose-built data center with 19 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 7.3% population growth over the last five years. Employment growth is led by healthcare, logistics, education and professional services sectors.

Site Description

The site contains approximately 14.14 acres and is generally level with frontage along Sunset Drive. Access to the site is provided by 33 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 44 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 32.32 acres and is generally level with frontage along Sunset Drive.

Submarket Analysis

Rent growth in the submarket has averaged 3.1% annually over the past 6 years. Carrier-neutral meet-me room supports multiple fiber providers. Market vacancy for comparable Data Center product stands at 12.3%, down from 5.3% two years ago. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

FICTITIOUS SAMPLE DOCUMENT — all names, figures and entities are invented for classroom training use only

Improvements Description

Common area interiors have been refreshed within the last 7 years and are in average to good condition. The facility is a purpose-built data center with 13 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The roof is a 37-year membrane system with an estimated remaining useful life of 8 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Common area interiors have been refreshed within the last 10 years and are in average to good condition. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting.

Improvements Description

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The roof is a 6-year membrane system with an estimated remaining useful life of 10 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 42 stories.

The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 32 stories. Carrier-neutral meet-me room supports multiple fiber providers. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Common area interiors have been refreshed within the last 9 years and are in average to good condition.

Building Systems

Carrier-neutral meet-me room supports multiple fiber providers. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The roof is a 28-year membrane system with an estimated remaining useful life of 6 years. Mechanical systems include rooftop package units and central plant equipment of varying age. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Income and Expense Review

Debt service coverage ratio was 7.74x on a trailing basis against a covenant minimum of 1.20x. Effective gross income for the trailing period was $442,000, representing a 3.6% increase over the prior year. The going-in capitalization rate of 7.71% reflects the in-place income and the stabilized occupancy assumption. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 39 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

The facility is a purpose-built data center with 41 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Management fees are calculated at 3.9% of collected revenue and are included in operating expenses. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Valuation Discussion

Net operating income is projected to grow at a compound annual rate of 6.8% over the hold period. The going-in capitalization rate of 6.67% reflects the in-place income and the stabilized occupancy assumption. Effective gross income for the trailing period was $323,000, representing a 4.3% increase over the prior year. Carrier-neutral meet-me room supports multiple fiber providers.

Management fees are calculated at 7.9% of collected revenue and are included in operating expenses. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. Operating expenses totaled $24,000 or approximately 14.78 per square foot, with real estate taxes representing the largest line item.

Income and Expense Review

Debt service coverage ratio was 6.37x on a trailing basis against a covenant minimum of 1.20x. Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 15 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Operating expenses totaled $343,000 or approximately 47.45 per square foot, with real estate taxes representing the largest line item.

Management fees are calculated at 6.3% of collected revenue and are included in operating expenses. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The going-in capitalization rate of 7.96% reflects the in-place income and the stabilized occupancy assumption. Carrier-neutral meet-me room supports multiple fiber providers.

Supply and Demand

Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 3.1% population growth over the last five years. Rent growth in the submarket has averaged 5.6% annually over the past 11 years. Market vacancy for comparable Data Center product stands at 12.5%, down from 5.9% two years ago. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 5.85% and 5.85%.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 6.38% and 6.38%. Carrier-neutral meet-me room supports multiple fiber providers. Rent growth in the submarket has averaged 8.0% annually over the past 3 years. Median household income within a 9-mile radius of the property is approximately $100,000 and has grown 5.7% annually.

Site Description

Access to the site is provided by 44 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 28.28 acres and is generally level with frontage along Sunset Drive. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Supply and Demand

Rent growth in the submarket has averaged 4.8% annually over the past 11 years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Median household income within a 9-mile radius of the property is approximately $321,000 and has grown 4.7% annually. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 8.1% population growth over the last five years.

The Pittsburgh Data Center market has experienced absorption of 2900 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. The facility is a purpose-built data center with 47 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 8.4% population growth over the last five years. Carrier-neutral meet-me room supports multiple fiber providers. Market vacancy for comparable Data Center product stands at 6.3%, down from 5.7% two years ago.

Access and Utilities

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 7.7 acres and is generally level with frontage along Sunset Drive. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 46.46 acres and is generally level with frontage along Sunset Drive. Access to the site is provided by 20 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Market Overview

Carrier-neutral meet-me room supports multiple fiber providers. Median household income within a 7-mile radius of the property is approximately $41,000 and has grown 4.5% annually. Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 5.57% and 5.57%. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Market vacancy for comparable Data Center product stands at 3.2%, down from 4.3% two years ago. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Construction Details

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 15 stories. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The roof is a 11-year membrane system with an estimated remaining useful life of 11 years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition.

Carrier-neutral meet-me room supports multiple fiber providers. The roof is a 36-year membrane system with an estimated remaining useful life of 3 years. Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 16 stories. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Mechanical systems include rooftop package units and central plant equipment of varying age. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation.

Building Systems

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Mechanical systems include rooftop package units and central plant equipment of varying age. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 35 stories. The roof is a 5-year membrane system with an estimated remaining useful life of 9 years.

The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Mechanical systems include rooftop package units and central plant equipment of varying age. Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 22 stories.
