QUARTERLY INVESTOR REPORT

Timberline Everett Data Campus | Boise, ID

Investment	Timberline Everett Data Campus
Quarter	2Q 2025
Report Date	January 19, 2026
Sponsor	Sunbelt Ridge Acquisitions
Occupancy	91.9%

Investor Distributions

The business plan contemplates a hold period of 5 years with disposition upon achievement of target returns. Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Leasing velocity improved during the period and management expects further upward pressure on in-place rents.

Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. The business plan contemplates a hold period of 5 years with disposition upon achievement of target returns. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions.

Property Operations

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The manager completes a monthly walk of the property and submits a variance report to the owner by the 37th business day. Service requests are tracked through a work-order system with an average completion time of 14 hours. Carrier-neutral meet-me room supports multiple fiber providers. Collections for the period were 97.0% of billed charges, with bad debt of 7.1% of gross potential income.

On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 43 additional team members. Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 2 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The manager completes a monthly walk of the property and submits a variance report to the owner by the 9th business day.

Risk Considerations

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Projected levered IRR is 5.5% with an equity multiple of 1.7x over the hold period. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The facility is a purpose-built data center with 11 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Distributions to investors for the quarter were paid at an annualized rate of 6.1% on contributed capital. The facility is a purpose-built data center with 20 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Carrier-neutral meet-me room supports multiple fiber providers.

Investment Overview

Projected levered IRR is 6.1% with an equity multiple of 1.8x over the hold period. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Distributions to investors for the quarter were paid at an annualized rate of 3.3% on contributed capital. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Carrier-neutral meet-me room supports multiple fiber providers.

Leasing velocity improved during the period and management expects further upward pressure on in-place rents. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Projected levered IRR is 11.9% with an equity multiple of 1.38x over the hold period. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The business plan contemplates a hold period of 10 years with disposition upon achievement of target returns. Carrier-neutral meet-me room supports multiple fiber providers.

Management Commentary

Carrier-neutral meet-me room supports multiple fiber providers. Service requests are tracked through a work-order system with an average completion time of 7 hours. The manager completes a monthly walk of the property and submits a variance report to the owner by the 25th business day. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 37 additional team members. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Collections for the period were 93.9% of billed charges, with bad debt of 5.0% of gross potential income. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Service requests are tracked through a work-order system with an average completion time of 31 hours.

Investment Overview

The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The facility is a purpose-built data center with 21 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers.

Distributions to investors for the quarter were paid at an annualized rate of 5.1% on contributed capital. The business plan contemplates a hold period of 8 years with disposition upon achievement of target returns. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Carrier-neutral meet-me room supports multiple fiber providers.

Management Commentary

Carrier-neutral meet-me room supports multiple fiber providers. Collections for the period were 88.6% of billed charges, with bad debt of 5.2% of gross potential income. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 40 additional team members.

Operating Performance

Carrier-neutral meet-me room supports multiple fiber providers. The going-in capitalization rate of 7.58% reflects the in-place income and the stabilized occupancy assumption. Operating expenses totaled $196,000 or approximately 10.30 per square foot, with real estate taxes representing the largest line item. Management fees are calculated at 6.2% of collected revenue and are included in operating expenses. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Debt service coverage ratio was 8.20x on a trailing basis against a covenant minimum of 1.20x.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Debt service coverage ratio was 6.79x on a trailing basis against a covenant minimum of 1.20x. The going-in capitalization rate of 6.56% reflects the in-place income and the stabilized occupancy assumption. Net operating income is projected to grow at a compound annual rate of 5.9% over the hold period.

Submarket Analysis

Rent growth in the submarket has averaged 5.8% annually over the past 3 years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Market vacancy for comparable Data Center product stands at 4.2%, down from 6.7% two years ago. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Median household income within a 7-mile radius of the property is approximately $189,000 and has grown 6.2% annually. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Rent growth in the submarket has averaged 4.9% annually over the past 3 years. The facility is a purpose-built data center with 15 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Operating Performance

The facility is a purpose-built data center with 46 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The going-in capitalization rate of 6.61% reflects the in-place income and the stabilized occupancy assumption. Carrier-neutral meet-me room supports multiple fiber providers. Net operating income is projected to grow at a compound annual rate of 6.3% over the hold period. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Management fees are calculated at 6.7% of collected revenue and are included in operating expenses.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Effective gross income for the trailing period was $83,000, representing a 4.7% increase over the prior year. Management fees are calculated at 5.0% of collected revenue and are included in operating expenses. Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 27 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Net operating income is projected to grow at a compound annual rate of 5.5% over the hold period.

Demographics and Employment

Timberline Everett Data Campus is located in Boise, ID, a market that has recorded 13.9% population growth over the last five years. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Investor demand for Data Center assets in Boise remains strong with recent trades at capitalization rates between 6.03% and 6.03%. Rent growth in the submarket has averaged 7.8% annually over the past 8 years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Investor Distributions

Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 43 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Distributions to investors for the quarter were paid at an annualized rate of 4.2% on contributed capital.

Carrier-neutral meet-me room supports multiple fiber providers. Distributions to investors for the quarter were paid at an annualized rate of 4.8% on contributed capital. The business plan contemplates a hold period of 8 years with disposition upon achievement of target returns. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. The facility is a purpose-built data center with 29 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Property Operations

Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Service requests are tracked through a work-order system with an average completion time of 47 hours. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

The facility is a purpose-built data center with 37 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Service requests are tracked through a work-order system with an average completion time of 13 hours. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Collections for the period were 90.8% of billed charges, with bad debt of 3.2% of gross potential income.

Business Plan Progress

Carrier-neutral meet-me room supports multiple fiber providers. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Projected levered IRR is 11.0% with an equity multiple of 1.39x over the hold period. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Distributions to investors for the quarter were paid at an annualized rate of 3.7% on contributed capital. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. The facility is a purpose-built data center with 18 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Leasing and Marketing

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 11 additional team members. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Valuation Discussion

Effective gross income for the trailing period was $24,000, representing a 8.8% increase over the prior year. Carrier-neutral meet-me room supports multiple fiber providers. Debt service coverage ratio was 6.05x on a trailing basis against a covenant minimum of 1.20x. The going-in capitalization rate of 6.02% reflects the in-place income and the stabilized occupancy assumption.

Debt service coverage ratio was 5.26x on a trailing basis against a covenant minimum of 1.20x. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The going-in capitalization rate of 6.28% reflects the in-place income and the stabilized occupancy assumption. Carrier-neutral meet-me room supports multiple fiber providers. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income.

Demographics and Employment

New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. The facility is a purpose-built data center with 34 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Employment growth is led by healthcare, logistics, education and professional services sectors. Median household income within a 2-mile radius of the property is approximately $399,000 and has grown 3.5% annually. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Investor demand for Data Center assets in Boise remains strong with recent trades at capitalization rates between 7.77% and 7.77%.

Median household income within a 5-mile radius of the property is approximately $165,000 and has grown 2.5% annually. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Market vacancy for comparable Data Center product stands at 2.4%, down from 7.8% two years ago. Carrier-neutral meet-me room supports multiple fiber providers. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Employment growth is led by healthcare, logistics, education and professional services sectors.

Valuation Discussion

Management fees are calculated at 6.8% of collected revenue and are included in operating expenses. Effective gross income for the trailing period was $351,000, representing a 11.9% increase over the prior year. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The going-in capitalization rate of 6.32% reflects the in-place income and the stabilized occupancy assumption. The facility is a purpose-built data center with 19 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Net operating income is projected to grow at a compound annual rate of 7.8% over the hold period. Management fees are calculated at 5.7% of collected revenue and are included in operating expenses. Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Market Overview

Employment growth is led by healthcare, logistics, education and professional services sectors. Timberline Everett Data Campus is located in Boise, ID, a market that has recorded 4.1% population growth over the last five years. Rent growth in the submarket has averaged 6.1% annually over the past 9 years. Carrier-neutral meet-me room supports multiple fiber providers.

Business Plan Progress

Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. The facility is a purpose-built data center with 10 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The business plan contemplates a hold period of 6 years with disposition upon achievement of target returns.

Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The business plan contemplates a hold period of 8 years with disposition upon achievement of target returns. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Management Commentary

Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 12 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The manager completes a monthly walk of the property and submits a variance report to the owner by the 33th business day. Collections for the period were 94.6% of billed charges, with bad debt of 6.6% of gross potential income.

On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 19 additional team members. Carrier-neutral meet-me room supports multiple fiber providers. Service requests are tracked through a work-order system with an average completion time of 21 hours. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 4 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Investor Distributions

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Carrier-neutral meet-me room supports multiple fiber providers.

Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Distributions to investors for the quarter were paid at an annualized rate of 3.5% on contributed capital. The facility is a purpose-built data center with 48 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Projected levered IRR is 4.4% with an equity multiple of 1.16x over the hold period. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.
