PHASE I ENVIRONMENTAL SITE ASSESSMENT

Driftwood Town Center | San Diego, CA

Site	Driftwood Town Center
Address	3892 Peachtree Court, San Diego, CA 51055
Prepared For	Juniper Peak Real Estate Fund
Report Date	March 23, 2022
Standard	ASTM E1527-21

Topography and Flood Zone

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 26 curb cuts and the property is served by municipal water and sanitary sewer.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 12 curb cuts and the property is served by municipal water and sanitary sewer.

Historical Use

No recognized environmental conditions (RECs) were identified in connection with the subject property. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Vapor encroachment screening did not identify a condition requiring further evaluation. Historical sources indicate the site was previously used for agricultural and light commercial purposes.

Topography and Flood Zone

Access to the site is provided by 19 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 8 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 3.3 acres and is generally level with frontage along Peachtree Court.

Historical Use

Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 7 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation. No recognized environmental conditions (RECs) were identified in connection with the subject property.

Site Description

Access to the site is provided by 4 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 10.10 acres and is generally level with frontage along Peachtree Court. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 37 curb cuts and the property is served by municipal water and sanitary sewer.

Findings and Opinions

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No recognized environmental conditions (RECs) were identified in connection with the subject property. A former dry cleaner located 7 blocks to the north is listed as a closed case and is not expected to impact the site. Vapor encroachment screening did not identify a condition requiring further evaluation. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.

No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

Site Description

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 42.42 acres and is generally level with frontage along Peachtree Court. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 33 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 17.17 acres and is generally level with frontage along Peachtree Court. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 4 curb cuts and the property is served by municipal water and sanitary sewer.

Findings and Opinions

No recognized environmental conditions (RECs) were identified in connection with the subject property. Vapor encroachment screening did not identify a condition requiring further evaluation. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. A former dry cleaner located 3 blocks to the north is listed as a closed case and is not expected to impact the site.

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 4 blocks to the north is listed as a closed case and is not expected to impact the site. No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.

A former dry cleaner located 3 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Site Description

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 27 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 36.36 acres and is generally level with frontage along Peachtree Court.
