PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dunmore Calloway Health Center | Boston, MA

Site	Dunmore Calloway Health Center
Address	5858 Centennial Way, Boston, MA 67666
Prepared For	Tidewater Core Fund
Report Date	December 1, 2017
Standard	ASTM E1527-21

Access and Utilities

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 18 curb cuts and the property is served by municipal water and sanitary sewer.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 29.29 acres and is generally level with frontage along Centennial Way. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Findings and Opinions

No recognized environmental conditions (RECs) were identified in connection with the subject property. Vapor encroachment screening did not identify a condition requiring further evaluation. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.

Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 3 blocks to the north is listed as a closed case and is not expected to impact the site. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes.

Site Description

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 42 curb cuts and the property is served by municipal water and sanitary sewer.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 23.23 acres and is generally level with frontage along Centennial Way. Access to the site is provided by 43 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Records Review

Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. A former dry cleaner located 5 blocks to the north is listed as a closed case and is not expected to impact the site. Historical sources indicate the site was previously used for agricultural and light commercial purposes.

Site Description

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 7.7 acres and is generally level with frontage along Centennial Way. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 47 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 21 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Findings and Opinions

No recognized environmental conditions (RECs) were identified in connection with the subject property. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A former dry cleaner located 9 blocks to the north is listed as a closed case and is not expected to impact the site.

Vapor encroachment screening did not identify a condition requiring further evaluation. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No recognized environmental conditions (RECs) were identified in connection with the subject property. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Access and Utilities

Access to the site is provided by 31 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 22.22 acres and is generally level with frontage along Centennial Way. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 11.11 acres and is generally level with frontage along Centennial Way. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 6 curb cuts and the property is served by municipal water and sanitary sewer.

Site Reconnaissance

A former dry cleaner located 6 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No recognized environmental conditions (RECs) were identified in connection with the subject property.

Vapor encroachment screening did not identify a condition requiring further evaluation. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 7 blocks to the north is listed as a closed case and is not expected to impact the site. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No recognized environmental conditions (RECs) were identified in connection with the subject property.

Site Description

Access to the site is provided by 26 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 35.35 acres and is generally level with frontage along Centennial Way. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Records Review

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No recognized environmental conditions (RECs) were identified in connection with the subject property. A former dry cleaner located 7 blocks to the north is listed as a closed case and is not expected to impact the site.

Historical sources indicate the site was previously used for agricultural and light commercial purposes. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A former dry cleaner located 6 blocks to the north is listed as a closed case and is not expected to impact the site. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

Site Reconnaissance

A former dry cleaner located 3 blocks to the north is listed as a closed case and is not expected to impact the site. Vapor encroachment screening did not identify a condition requiring further evaluation. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Historical sources indicate the site was previously used for agricultural and light commercial purposes. No recognized environmental conditions (RECs) were identified in connection with the subject property. A former dry cleaner located 1 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation.

Site Reconnaissance

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A former dry cleaner located 4 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Vapor encroachment screening did not identify a condition requiring further evaluation. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 2 blocks to the north is listed as a closed case and is not expected to impact the site. No recognized environmental conditions (RECs) were identified in connection with the subject property.

Topography and Flood Zone

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 33.33 acres and is generally level with frontage along Centennial Way. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 23 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 23.23 acres and is generally level with frontage along Centennial Way. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 15 curb cuts and the property is served by municipal water and sanitary sewer.

Historical Use

A former dry cleaner located 7 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation. No recognized environmental conditions (RECs) were identified in connection with the subject property. Historical sources indicate the site was previously used for agricultural and light commercial purposes.

A former dry cleaner located 9 blocks to the north is listed as a closed case and is not expected to impact the site. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Vapor encroachment screening did not identify a condition requiring further evaluation.

Site Description

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 18 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 34.34 acres and is generally level with frontage along Centennial Way. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 20.20 acres and is generally level with frontage along Centennial Way. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 7 curb cuts and the property is served by municipal water and sanitary sewer.

Site Reconnaissance

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. No recognized environmental conditions (RECs) were identified in connection with the subject property. A former dry cleaner located 7 blocks to the north is listed as a closed case and is not expected to impact the site. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.
