RENT ROLL

Kestrel Data Campus | Dallas, TX

Property	Kestrel Data Campus
Report	Rent Roll as of January 22, 2021
Address	714 Liberty Drive, Dallas, TX 71570
Total Size	213,993 SF
Prepared By	Lumen Residential Services

Summary and Notes

Operating Performance

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. Operating expenses totaled $396,000 or approximately 35.23 per square foot, with real estate taxes representing the largest line item. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Debt service coverage ratio was 5.90x on a trailing basis against a covenant minimum of 1.20x. Net operating income is projected to grow at a compound annual rate of 7.0% over the hold period.

Effective gross income for the trailing period was $219,000, representing a 4.8% increase over the prior year. Debt service coverage ratio was 6.15x on a trailing basis against a covenant minimum of 1.20x. Operating expenses totaled $444,000 or approximately 36.18 per square foot, with real estate taxes representing the largest line item. Management fees are calculated at 4.8% of collected revenue and are included in operating expenses. The going-in capitalization rate of 8.02% reflects the in-place income and the stabilized occupancy assumption.

Leasing and Marketing

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. The facility is a purpose-built data center with 2 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 14 additional team members. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. Service requests are tracked through a work-order system with an average completion time of 28 hours. The facility is a purpose-built data center with 30 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.
