PHASE I ENVIRONMENTAL SITE ASSESSMENT

Jasper Verde Secure Storage | Boston, MA

Site	Jasper Verde Secure Storage
Address	8253 Heritage Drive, Boston, MA 66047
Prepared For	Anchorage Meadow Partners
Report Date	August 7, 2021
Standard	ASTM E1527-21

Site Description

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 15 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 35 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 28.28 acres and is generally level with frontage along Heritage Drive. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Findings and Opinions

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation. No recognized environmental conditions (RECs) were identified in connection with the subject property. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 4 blocks to the north is listed as a closed case and is not expected to impact the site.

Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Vapor encroachment screening did not identify a condition requiring further evaluation. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No recognized environmental conditions (RECs) were identified in connection with the subject property. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Topography and Flood Zone

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 14.14 acres and is generally level with frontage along Heritage Drive. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

The site contains approximately 7.7 acres and is generally level with frontage along Heritage Drive. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 43 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Site Reconnaissance

No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation.
