Risk Considerations

Distributions to investors for the quarter were paid at an annualized rate of 3.9% on contributed capital. Percentage rent and CAM reimbursements are tracked separately for the commercial component. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Projected levered IRR is 12.4% with an equity multiple of 1.45x over the hold period. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market.

The business plan contemplates a hold period of 6 years with disposition upon achievement of target returns. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. The project combines ground-floor retail and restaurant space with upper-level residential and office components. Projected levered IRR is 4.6% with an equity multiple of 1.34x over the hold period.

Submarket Analysis

Employment growth is led by healthcare, logistics, education and professional services sectors. The property is walkable to transit, with 12 structured parking spaces shared between uses. Heritage Station District is located in St. Louis, MO, a market that has recorded 2.2% population growth over the last five years. Percentage rent and CAM reimbursements are tracked separately for the commercial component.

The project combines ground-floor retail and restaurant space with upper-level residential and office components. Employment growth is led by healthcare, logistics, education and professional services sectors. Market vacancy for comparable Mixed-Use product stands at 2.9%, down from 4.8% two years ago. The St. Louis Mixed-Use market has experienced absorption of 2900 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Percentage rent and CAM reimbursements are tracked separately for the commercial component.

Investor Distributions

The business plan contemplates a hold period of 4 years with disposition upon achievement of target returns. The property is walkable to transit, with 15 structured parking spaces shared between uses. Percentage rent and CAM reimbursements are tracked separately for the commercial component. Projected levered IRR is 3.0% with an equity multiple of 1.40x over the hold period. Distributions to investors for the quarter were paid at an annualized rate of 4.3% on contributed capital.

Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. The project combines ground-floor retail and restaurant space with upper-level residential and office components. Projected levered IRR is 6.6% with an equity multiple of 1.22x over the hold period. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. The property is walkable to transit, with 19 structured parking spaces shared between uses.

Demographics and Employment

Percentage rent and CAM reimbursements are tracked separately for the commercial component. The project combines ground-floor retail and restaurant space with upper-level residential and office components. Rent growth in the submarket has averaged 5.7% annually over the past 8 years. The St. Louis Mixed-Use market has experienced absorption of 800 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

Heritage Station District is located in St. Louis, MO, a market that has recorded 13.4% population growth over the last five years. Investor demand for Mixed-Use assets in St. Louis remains strong with recent trades at capitalization rates between 7.10% and 7.10%. Percentage rent and CAM reimbursements are tracked separately for the commercial component. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Median household income within a 2-mile radius of the property is approximately $199,000 and has grown 2.5% annually.

Business Plan Progress

Projected levered IRR is 2.4% with an equity multiple of 1.16x over the hold period. The business plan contemplates a hold period of 12 years with disposition upon achievement of target returns. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market.

The project combines ground-floor retail and restaurant space with upper-level residential and office components. Building Systems

Heritage Station District was originally constructed in 1994 and consists of 25,982 SF in a building of 26 stories. Common area interiors have been refreshed within the last 11 years and are in average to good condition. Percentage rent and CAM reimbursements are tracked separately for the commercial component. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting.

The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Heritage Station District was originally constructed in 1994 and consists of 25,982 SF in a building of 30 stories. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. The project combines ground-floor retail and restaurant space with upper-level residential and office components. The roof is a 29-year membrane system with an estimated remaining useful life of 10 years.

Income and Expense Review

Net operating income is projected to grow at a compound annual rate of 6.0% over the hold period. Percentage rent and CAM reimbursements are tracked separately for the commercial component. The project combines ground-floor retail and restaurant space with upper-level residential and office components. The going-in capitalization rate of 7.83% reflects the in-place income and the stabilized occupancy assumption. Effective gross income for the trailing period was $218,000, representing a 12.2% increase over the prior year. Management fees are calculated at 3.5% of collected revenue and are included in operating expenses.

A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. The property is walkable to transit, with 18 structured parking spaces shared between uses. The project combines ground-floor retail and restaurant space with upper-level residential and office components. Percentage rent and CAM reimbursements are tracked separately for the commercial component.

Construction Details

Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. The project combines ground-floor retail and restaurant space with upper-level residential and office components. The roof is a 21-year membrane system with an estimated remaining useful life of 12 years. Heritage Station District was originally constructed in 1994 and consists of 25,982 SF in a building of 19 stories. Mechanical systems include rooftop package units and central plant equipment of varying age. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition.

The property is walkable to transit, with 19 structured parking spaces shared between uses. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. The project combines ground-floor retail and restaurant space with upper-level residential and office components. The roof is a 32-year membrane system with an estimated remaining useful life of 5 years. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition.

Income and Expense Review

Net operating income is projected to grow at a compound annual rate of 5.4% over the hold period. Effective gross income for the trailing period was $133,000, representing a 13.5% increase over the prior year. Operating expenses totaled $247,000 or approximately 24.10 per square foot, with real estate taxes representing the largest line item. The property is walkable to transit, with 9 structured parking spaces shared between uses. The going-in capitalization rate of 6.89% reflects the in-place income and the stabilized occupancy assumption.

Debt service coverage ratio was 7.58x on a trailing basis against a covenant minimum of 1.20x. Operating expenses totaled $176,000 or approximately 9.83 per square foot, with real estate taxes representing the largest line item. Percentage rent and CAM reimbursements are tracked separately for the commercial component. Effective gross income for the trailing period was $199,000, representing a 5.8% increase over the prior year. Net operating income is projected to grow at a compound annual rate of 5.1% over the hold period.

Improvements Description

Common area interiors have been refreshed within the last 9 years and are in average to good condition. The project combines ground-floor retail and restaurant space with upper-level residential and office components. The property is walkable to transit, with 31 structured parking spaces shared between uses. The roof is a 38-year membrane system with an estimated remaining useful life of 7 years. Mechanical systems include rooftop package units and central plant equipment of varying age. Percentage rent and CAM reimbursements are tracked separately for the commercial component.

Percentage rent and CAM reimbursements are tracked separately for the commercial component. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Leasing and Marketing

Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. Collections for the period were 92.3% of billed charges, with bad debt of 6.2% of gross potential income. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. The manager completes a monthly walk of the property and submits a variance report to the owner by the 14th business day.

Percentage rent and CAM reimbursements are tracked separately for the commercial component. Collections for the period were 93.1% of billed charges, with bad debt of 4.3% of gross potential income. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Service requests are tracked through a work-order system with an average completion time of 2 hours.

Demographics and Employment

The property is walkable to transit, with 35 structured parking spaces shared between uses. Percentage rent and CAM reimbursements are tracked separately for the commercial component. Median household income within a 4-mile radius of the property is approximately $55,000 and has grown 5.3% annually. Investor demand for Mixed-Use assets in St. Louis remains strong with recent trades at capitalization rates between 7.44% and 7.44%.

The St. Louis Mixed-Use market has experienced absorption of 4700 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Rent growth in the submarket has averaged 5.6% annually over the past 8 years. Market vacancy for comparable Mixed-Use product stands at 8.1%, down from 7.8% two years ago. Heritage Station District is located in St. Louis, MO, a market that has recorded 4.8% population growth over the last five years. Employment growth is led by healthcare, logistics, education and professional services sectors.

Leasing and Marketing

Percentage rent and CAM reimbursements are tracked separately for the commercial component. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. The property is walkable to transit, with 7 structured parking spaces shared between uses. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. The manager completes a monthly walk of the property and submits a variance report to the owner by the 8th business day. Collections for the period were 96.8% of billed charges, with bad debt of 7.4% of gross potential income.

Percentage rent and CAM reimbursements are tracked separately for the commercial component. Service requests are tracked through a work-order system with an average completion time of 26 hours. The manager completes a monthly walk of the property and submits a variance report to the owner by the 4th business day. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Collections for the period were 92.4% of billed charges, with bad debt of 5.5% of gross potential income.

Demographics and Employment

Heritage Station District is located in St. Louis, MO, a market that has recorded 3.9% population growth over the last five years. The property is walkable to transit, with 17 structured parking spaces shared between uses. Rent growth in the submarket has averaged 7.5% annually over the past 11 years. The St. Louis Mixed-Use market has experienced absorption of 400 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Investor demand for Mixed-Use assets in St. Louis remains strong with recent trades at capitalization rates between 7.46% and 7.46%.

Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Investor demand for Mixed-Use assets in St. Louis remains strong with recent trades at capitalization rates between 5.59% and 5.59%. The project combines ground-floor retail and restaurant space with upper-level residential and office components. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Leasing and Marketing

Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. Collections for the period were 94.9% of billed charges, with bad debt of 3.1% of gross potential income. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 19 additional team members. The manager completes a monthly walk of the property and submits a variance report to the owner by the 36th business day. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. The property is walkable to transit, with 26 structured parking spaces shared between uses.

On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 7 additional team members. Service requests are tracked through a work-order system with an average completion time of 3 hours. The manager completes a monthly walk of the property and submits a variance report to the owner by the 40th business day. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period.

Supply and Demand

Percentage rent and CAM reimbursements are tracked separately for the commercial component. The project combines ground-floor retail and restaurant space with upper-level residential and office components. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. The St. Louis Mixed-Use market has experienced absorption of 500 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. The property is walkable to transit, with 33 structured parking spaces shared between uses.

Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Employment growth is led by healthcare, logistics, education and professional services sectors. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. The property is walkable to transit, with 35 structured parking spaces shared between uses. Percentage rent and CAM reimbursements are tracked separately for the commercial component.

Risk Considerations

Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. The project combines ground-floor retail and restaurant space with upper-level residential and office components. The business plan contemplates a hold period of 11 years with disposition upon achievement of target returns.

Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Projected levered IRR is 6.2% with an equity multiple of 1.13x over the hold period. The business plan contemplates a hold period of 3 years with disposition upon achievement of target returns. The project combines ground-floor retail and restaurant space with upper-level residential and office components.
