OFFERING MEMORANDUM

Cobalt Data Campus | Nashville, TN

Property	Cobalt Data Campus
Location	6786 Grand Street, Nashville, TN 28227
Property Type	Data Center
Size	18,981 SF
Year Built	2019
Offering	Unpriced - Offers Due July 17, 2024

Investor Distributions

The business plan contemplates a hold period of 9 years with disposition upon achievement of target returns. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. Projected levered IRR is 6.2% with an equity multiple of 1.27x over the hold period. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Projected levered IRR is 10.2% with an equity multiple of 1.17x over the hold period. Carrier-neutral meet-me room supports multiple fiber providers.

Demographics and Employment

The facility is a purpose-built data center with 33 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Investor demand for Data Center assets in Nashville remains strong with recent trades at capitalization rates between 7.83% and 7.83%. Market vacancy for comparable Data Center product stands at 2.0%, down from 6.0% two years ago. Carrier-neutral meet-me room supports multiple fiber providers.

Market vacancy for comparable Data Center product stands at 3.7%, down from 6.6% two years ago. Median household income within a 8-mile radius of the property is approximately $63,000 and has grown 9.5% annually. The Nashville Data Center market has experienced absorption of 2800 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Cobalt Data Campus is located in Nashville, TN, a market that has recorded 5.3% population growth over the last five years.

Investor Distributions

Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Projected levered IRR is 3.2% with an equity multiple of 1.33x over the hold period. Distributions to investors for the quarter were paid at an annualized rate of 4.9% on contributed capital. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. The facility is a purpose-built data center with 48 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

The business plan contemplates a hold period of 11 years with disposition upon achievement of target returns. The facility is a purpose-built data center with 38 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Submarket Analysis

Rent growth in the submarket has averaged 3.7% annually over the past 4 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. Cobalt Data Campus is located in Nashville, TN, a market that has recorded 6.6% population growth over the last five years. Market vacancy for comparable Data Center product stands at 4.0%, down from 7.6% two years ago.

Risk Considerations

The business plan contemplates a hold period of 9 years with disposition upon achievement of target returns. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Projected levered IRR is 6.0% with an equity multiple of 1.32x over the hold period. The facility is a purpose-built data center with 11 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions.

The business plan contemplates a hold period of 12 years with disposition upon achievement of target returns. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. The facility is a purpose-built data center with 39 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Demographics and Employment

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Cobalt Data Campus is located in Nashville, TN, a market that has recorded 8.0% population growth over the last five years. Rent growth in the submarket has averaged 4.3% annually over the past 9 years. The Nashville Data Center market has experienced absorption of 200 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Cobalt Data Campus is located in Nashville, TN, a market that has recorded 8.5% population growth over the last five years.

Business Plan Progress

Projected levered IRR is 6.0% with an equity multiple of 1.40x over the hold period. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. The facility is a purpose-built data center with 2 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions.

Distributions to investors for the quarter were paid at an annualized rate of 4.6% on contributed capital. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. The business plan contemplates a hold period of 11 years with disposition upon achievement of target returns. Leasing velocity improved during the period and management expects further upward pressure on in-place rents.

Demographics and Employment

Carrier-neutral meet-me room supports multiple fiber providers. Median household income within a 8-mile radius of the property is approximately $201,000 and has grown 5.5% annually. Cobalt Data Campus is located in Nashville, TN, a market that has recorded 2.5% population growth over the last five years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Rent growth in the submarket has averaged 4.3% annually over the past 3 years. The Nashville Data Center market has experienced absorption of 1000 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

Carrier-neutral meet-me room supports multiple fiber providers. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. The Nashville Data Center market has experienced absorption of 3500 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Rent growth in the submarket has averaged 4.6% annually over the past 11 years.

Risk Considerations

Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The business plan contemplates a hold period of 7 years with disposition upon achievement of target returns. Carrier-neutral meet-me room supports multiple fiber providers.

Building Systems

The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Carrier-neutral meet-me room supports multiple fiber providers. The roof is a 4-year membrane system with an estimated remaining useful life of 5 years. Mechanical systems include rooftop package units and central plant equipment of varying age. Cobalt Data Campus was originally constructed in 2019 and consists of 18,981 SF in a building of 14 stories.

Cobalt Data Campus was originally constructed in 2019 and consists of 18,981 SF in a building of 37 stories. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The roof is a 37-year membrane system with an estimated remaining useful life of 7 years. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition.

Income and Expense Review

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Net operating income is projected to grow at a compound annual rate of 4.2% over the hold period. Management fees are calculated at 7.3% of collected revenue and are included in operating expenses. The facility is a purpose-built data center with 22 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers. The going-in capitalization rate of 5.06% reflects the in-place income and the stabilized occupancy assumption.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The going-in capitalization rate of 6.80% reflects the in-place income and the stabilized occupancy assumption. The facility is a purpose-built data center with 8 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Net operating income is projected to grow at a compound annual rate of 4.6% over the hold period. Carrier-neutral meet-me room supports multiple fiber providers. Operating expenses totaled $430,000 or approximately 12.62 per square foot, with real estate taxes representing the largest line item.

Improvements Description

Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. The roof is a 17-year membrane system with an estimated remaining useful life of 12 years. Carrier-neutral meet-me room supports multiple fiber providers. Common area interiors have been refreshed within the last 4 years and are in average to good condition. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The facility is a purpose-built data center with 16 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The roof is a 18-year membrane system with an estimated remaining useful life of 3 years. The facility is a purpose-built data center with 42 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Common area interiors have been refreshed within the last 8 years and are in average to good condition. Mechanical systems include rooftop package units and central plant equipment of varying age.

Financial Analysis

Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 26 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Operating expenses totaled $346,000 or approximately 18.58 per square foot, with real estate taxes representing the largest line item.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Management fees are calculated at 3.7% of collected revenue and are included in operating expenses. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Carrier-neutral meet-me room supports multiple fiber providers. Operating expenses totaled $53,000 or approximately 39.42 per square foot, with real estate taxes representing the largest line item. The facility is a purpose-built data center with 29 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Property Operations

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 11 additional team members. Collections for the period were 92.3% of billed charges, with bad debt of 4.1% of gross potential income. The manager completes a monthly walk of the property and submits a variance report to the owner by the 12th business day.

Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Service requests are tracked through a work-order system with an average completion time of 45 hours. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 18 additional team members. Collections for the period were 88.8% of billed charges, with bad debt of 3.6% of gross potential income.

Submarket Analysis

Investor demand for Data Center assets in Nashville remains strong with recent trades at capitalization rates between 5.42% and 5.42%. Carrier-neutral meet-me room supports multiple fiber providers. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. The Nashville Data Center market has experienced absorption of 1800 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Cobalt Data Campus is located in Nashville, TN, a market that has recorded 9.5% population growth over the last five years.

The Nashville Data Center market has experienced absorption of 2900 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Investor demand for Data Center assets in Nashville remains strong with recent trades at capitalization rates between 6.51% and 6.51%. The facility is a purpose-built data center with 35 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Rent growth in the submarket has averaged 3.3% annually over the past 6 years. Median household income within a 2-mile radius of the property is approximately $440,000 and has grown 9.2% annually.

Leasing and Marketing

Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Service requests are tracked through a work-order system with an average completion time of 15 hours. The manager completes a monthly walk of the property and submits a variance report to the owner by the 26th business day. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 11 additional team members.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 27 additional team members. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Service requests are tracked through a work-order system with an average completion time of 8 hours. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period.

Market Overview

Rent growth in the submarket has averaged 6.9% annually over the past 11 years. The facility is a purpose-built data center with 21 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Investor demand for Data Center assets in Nashville remains strong with recent trades at capitalization rates between 7.12% and 7.12%. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

The Nashville Data Center market has experienced absorption of 3900 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers.

Management Commentary

FICTITIOUS SAMPLE DOCUMENT — all names, figures and entities are invented for classroom training use only

Business Plan Progress

Projected levered IRR is 12.0% with an equity multiple of 1.38x over the hold period. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. Distributions to investors for the quarter were paid at an annualized rate of 5.2% on contributed capital.

Distributions to investors for the quarter were paid at an annualized rate of 5.0% on contributed capital. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Carrier-neutral meet-me room supports multiple fiber providers. The business plan contemplates a hold period of 8 years with disposition upon achievement of target returns. Projected levered IRR is 10.9% with an equity multiple of 1.37x over the hold period.

Demographics and Employment

Median household income within a 5-mile radius of the property is approximately $377,000 and has grown 7.9% annually. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Market vacancy for comparable Data Center product stands at 10.8%, down from 7.1% two years ago. The Nashville Data Center market has experienced absorption of 4100 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

Cobalt Data Campus is located in Nashville, TN, a market that has recorded 2.6% population growth over the last five years. Rent growth in the submarket has averaged 5.1% annually over the past 10 years. Median household income within a 9-mile radius of the property is approximately $131,000 and has grown 3.6% annually. Carrier-neutral meet-me room supports multiple fiber providers. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Employment growth is led by healthcare, logistics, education and professional services sectors.

Business Plan Progress

Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Projected levered IRR is 3.6% with an equity multiple of 1.13x over the hold period. The business plan contemplates a hold period of 12 years with disposition upon achievement of target returns. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market.

Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 22 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers. Projected levered IRR is 10.5% with an equity multiple of 1.40x over the hold period.

Submarket Analysis

Carrier-neutral meet-me room supports multiple fiber providers. Investor demand for Data Center assets in Nashville remains strong with recent trades at capitalization rates between 7.26% and 7.26%. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Employment growth is led by healthcare, logistics, education and professional services sectors. Market vacancy for comparable Data Center product stands at 4.2%, down from 7.6% two years ago.

Carrier-neutral meet-me room supports multiple fiber providers. The Nashville Data Center market has experienced absorption of 4400 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Market vacancy for comparable Data Center product stands at 9.0%, down from 6.5% two years ago. Median household income within a 2-mile radius of the property is approximately $339,000 and has grown 11.2% annually. Cobalt Data Campus is located in Nashville, TN, a market that has recorded 7.8% population growth over the last five years.

Investor Distributions

The facility is a purpose-built data center with 31 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Projected levered IRR is 11.4% with an equity multiple of 1.26x over the hold period. The business plan contemplates a hold period of 7 years with disposition upon achievement of target returns. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Construction Details

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Mechanical systems include rooftop package units and central plant equipment of varying age. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. The roof is a 39-year membrane system with an estimated remaining useful life of 10 years. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation.

Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Common area interiors have been refreshed within the last 6 years and are in average to good condition. Mechanical systems include rooftop package units and central plant equipment of varying age. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Valuation Discussion

Net operating income is projected to grow at a compound annual rate of 7.4% over the hold period. Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Management fees are calculated at 7.7% of collected revenue and are included in operating expenses.

The going-in capitalization rate of 8.06% reflects the in-place income and the stabilized occupancy assumption. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Management fees are calculated at 6.4% of collected revenue and are included in operating expenses.

Improvements Description

The roof is a 13-year membrane system with an estimated remaining useful life of 4 years. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Carrier-neutral meet-me room supports multiple fiber providers. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation.

Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Mechanical systems include rooftop package units and central plant equipment of varying age. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Common area interiors have been refreshed within the last 6 years and are in average to good condition. Cobalt Data Campus was originally constructed in 2019 and consists of 18,981 SF in a building of 19 stories.

Operating Performance

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. Operating expenses totaled $271,000 or approximately 43.33 per square foot, with real estate taxes representing the largest line item. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Net operating income is projected to grow at a compound annual rate of 6.0% over the hold period.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Debt service coverage ratio was 7.30x on a trailing basis against a covenant minimum of 1.20x. The going-in capitalization rate of 5.10% reflects the in-place income and the stabilized occupancy assumption. Net operating income is projected to grow at a compound annual rate of 7.2% over the hold period.

Improvements Description

Common area interiors have been refreshed within the last 6 years and are in average to good condition. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The facility is a purpose-built data center with 7 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Mechanical systems include rooftop package units and central plant equipment of varying age.

Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 16 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Mechanical systems include rooftop package units and central plant equipment of varying age.

Property Operations

The manager completes a monthly walk of the property and submits a variance report to the owner by the 4th business day. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 13 additional team members. The facility is a purpose-built data center with 35 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Carrier-neutral meet-me room supports multiple fiber providers. Service requests are tracked through a work-order system with an average completion time of 40 hours. Collections for the period were 95.8% of billed charges, with bad debt of 4.6% of gross potential income. The manager completes a monthly walk of the property and submits a variance report to the owner by the 13th business day. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Marketing efforts include digital listings, signage, broker outreach and a resident referral program.

Submarket Analysis

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 5 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Median household income within a 3-mile radius of the property is approximately $21,000 and has grown 13.9% annually. Carrier-neutral meet-me room supports multiple fiber providers.

The facility is a purpose-built data center with 11 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The Nashville Data Center market has experienced absorption of 2600 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Carrier-neutral meet-me room supports multiple fiber providers. Median household income within a 1-mile radius of the property is approximately $424,000 and has grown 7.9% annually. Rent growth in the submarket has averaged 7.8% annually over the past 10 years. Market vacancy for comparable Data Center product stands at 9.7%, down from 5.6% two years ago.

Property Operations

On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 28 additional team members. Collections for the period were 91.2% of billed charges, with bad debt of 7.4% of gross potential income. Service requests are tracked through a work-order system with an average completion time of 11 hours. The manager completes a monthly walk of the property and submits a variance report to the owner by the 36th business day.

Collections for the period were 88.9% of billed charges, with bad debt of 5.3% of gross potential income. The manager completes a monthly walk of the property and submits a variance report to the owner by the 33th business day. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 27 additional team members. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Market Overview

Rent growth in the submarket has averaged 3.6% annually over the past 10 years. Employment growth is led by healthcare, logistics, education and professional services sectors. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The Nashville Data Center market has experienced absorption of 4800 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Market vacancy for comparable Data Center product stands at 3.4%, down from 7.4% two years ago. Cobalt Data Campus is located in Nashville, TN, a market that has recorded 13.6% population growth over the last five years. Median household income within a 7-mile radius of the property is approximately $331,000 and has grown 5.0% annually. The Nashville Data Center market has experienced absorption of 3900 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Rent growth in the submarket has averaged 7.6% annually over the past 7 years. Investor demand for Data Center assets in Nashville remains strong with recent trades at capitalization rates between 8.16% and 8.16%.

Management Commentary

On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 27 additional team members. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. Collections for the period were 90.6% of billed charges, with bad debt of 6.2% of gross potential income. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Investor Distributions

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 34 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers. Projected levered IRR is 3.6% with an equity multiple of 1.44x over the hold period. The business plan contemplates a hold period of 12 years with disposition upon achievement of target returns. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions.

Carrier-neutral meet-me room supports multiple fiber providers. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Market Overview

Market vacancy for comparable Data Center product stands at 13.3%, down from 7.1% two years ago. Cobalt Data Campus is located in Nashville, TN, a market that has recorded 7.5% population growth over the last five years. Employment growth is led by healthcare, logistics, education and professional services sectors. Median household income within a 2-mile radius of the property is approximately $54,000 and has grown 11.7% annually. The Nashville Data Center market has experienced absorption of 1800 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. The facility is a purpose-built data center with 28 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Carrier-neutral meet-me room supports multiple fiber providers. Rent growth in the submarket has averaged 4.8% annually over the past 3 years. Investor demand for Data Center assets in Nashville remains strong with recent trades at capitalization rates between 7.62% and 7.62%. Cobalt Data Campus is located in Nashville, TN, a market that has recorded 3.7% population growth over the last five years. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Investor Distributions

Projected levered IRR is 5.9% with an equity multiple of 1.3x over the hold period. The facility is a purpose-built data center with 47 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Distributions to investors for the quarter were paid at an annualized rate of 4.4% on contributed capital.

The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Projected levered IRR is 11.2% with an equity multiple of 1.43x over the hold period. Carrier-neutral meet-me room supports multiple fiber providers. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Supply and Demand

Employment growth is led by healthcare, logistics, education and professional services sectors. Investor demand for Data Center assets in Nashville remains strong with recent trades at capitalization rates between 5.13% and 5.13%. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. The Nashville Data Center market has experienced absorption of 2100 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 17 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Carrier-neutral meet-me room supports multiple fiber providers. Median household income within a 2-mile radius of the property is approximately $263,000 and has grown 4.6% annually. Cobalt Data Campus is located in Nashville, TN, a market that has recorded 3.9% population growth over the last five years. Market vacancy for comparable Data Center product stands at 6.0%, down from 7.4% two years ago. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Risk Considerations

The facility is a purpose-built data center with 39 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Distributions to investors for the quarter were paid at an annualized rate of 6.9% on contributed capital.
