PHASE I ENVIRONMENTAL SITE ASSESSMENT

Ironwood Marketplace | Boston, MA

Site	Ironwood Marketplace
Address	8662 Grand Way, Boston, MA 97874
Prepared For	Granite Lane Realty
Report Date	July 24, 2019
Standard	ASTM E1527-21

Site Description

Access to the site is provided by 38 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 26 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Records Review

Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 6 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No recognized environmental conditions (RECs) were identified in connection with the subject property.

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. A former dry cleaner located 6 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation.

Topography and Flood Zone

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 35.35 acres and is generally level with frontage along Grand Way.

The site contains approximately 31.31 acres and is generally level with frontage along Grand Way. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 31 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Historical Use

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 1 blocks to the north is listed as a closed case and is not expected to impact the site. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.

Topography and Flood Zone

The site contains approximately 13.13 acres and is generally level with frontage along Grand Way. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 42 curb cuts and the property is served by municipal water and sanitary sewer.

The site contains approximately 18.18 acres and is generally level with frontage along Grand Way. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 29 curb cuts and the property is served by municipal water and sanitary sewer.

Site Reconnaissance

A former dry cleaner located 1 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

A former dry cleaner located 1 blocks to the north is listed as a closed case and is not expected to impact the site. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No recognized environmental conditions (RECs) were identified in connection with the subject property. Vapor encroachment screening did not identify a condition requiring further evaluation.

Site Description

Access to the site is provided by 32 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 6.6 acres and is generally level with frontage along Grand Way. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 23 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Site Reconnaissance

No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. A former dry cleaner located 8 blocks to the north is listed as a closed case and is not expected to impact the site. Historical sources indicate the site was previously used for agricultural and light commercial purposes.

A former dry cleaner located 4 blocks to the north is listed as a closed case and is not expected to impact the site. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No recognized environmental conditions (RECs) were identified in connection with the subject property.

Access and Utilities

The site contains approximately 29.29 acres and is generally level with frontage along Grand Way. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 18 curb cuts and the property is served by municipal water and sanitary sewer.

Findings and Opinions

Vapor encroachment screening did not identify a condition requiring further evaluation. No recognized environmental conditions (RECs) were identified in connection with the subject property. A former dry cleaner located 9 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation. No recognized environmental conditions (RECs) were identified in connection with the subject property. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

Findings and Opinions

Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 5 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No recognized environmental conditions (RECs) were identified in connection with the subject property.

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. No recognized environmental conditions (RECs) were identified in connection with the subject property. A former dry cleaner located 4 blocks to the north is listed as a closed case and is not expected to impact the site. Vapor encroachment screening did not identify a condition requiring further evaluation. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.

Records Review

A former dry cleaner located 3 blocks to the north is listed as a closed case and is not expected to impact the site. Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. No recognized environmental conditions (RECs) were identified in connection with the subject property.

No recognized environmental conditions (RECs) were identified in connection with the subject property. Vapor encroachment screening did not identify a condition requiring further evaluation. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

Topography and Flood Zone

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 2 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 22.22 acres and is generally level with frontage along Grand Way. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 11 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 7.7 acres and is generally level with frontage along Grand Way. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Site Reconnaissance

A former dry cleaner located 5 blocks to the north is listed as a closed case and is not expected to impact the site. No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes.
