# APPRAISAL REPORT

Dunmore Pelican Data Campus | Naperville, IL

| | |
|---|---|
| **Subject Property** | Dunmore Pelican Data Campus |
| **Address** | 8740 Medical Center Drive, Naperville, IL 92877 |
| **Property Rights Appraised** | Fee Simple |
| **Effective Date of Value** | June 6, 2019 |
| **Market Value Conclusion** | $160,740,000 |

## Supply and Demand

Investor demand for Data Center assets in Naperville remains strong with recent trades at capitalization rates between 6.59% and 6.59%. Dunmore Pelican Data Campus is located in Naperville, IL, a market that has recorded 11.6% population growth over the last five years. Market vacancy for comparable Data Center product stands at 7.4%, down from 4.7% two years ago. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers.

Dunmore Pelican Data Campus is located in Naperville, IL, a market that has recorded 3.7% population growth over the last five years. Investor demand for Data Center assets in Naperville remains strong with recent trades at capitalization rates between 5.54% and 5.54%. Employment growth is led by healthcare, logistics, education and professional services sectors. Median household income within a 9-mile radius of the property is approximately $138,000 and has grown 7.7% annually. The Naperville Data Center market has experienced absorption of 500 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Rent growth in the submarket has averaged 3.6% annually over the past 10 years.

## Site Description

Access to the site is provided by 46 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 8.8 acres and is generally level with frontage along Medical Center Drive. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Access to the site is provided by 28 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 14.14 acres and is generally level with frontage along Medical Center Drive. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

## Submarket Analysis

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. The Naperville Data Center market has experienced absorption of 3100 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Rent growth in the submarket has averaged 7.0% annually over the past 11 years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

## Submarket Analysis

Median household income within a 2-mile radius of the property is approximately $92,000 and has grown 2.7% annually. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Carrier-neutral meet-me room supports multiple fiber providers. Employment growth is led by healthcare, logistics, education and professional services sectors. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Dunmore Pelican Data Campus is located in Naperville, IL, a market that has recorded 5.9% population growth over the last five years. Median household income within a 1-mile radius of the property is approximately $157,000 and has grown 10.3% annually. Employment growth is led by healthcare, logistics, education and professional services sectors. Investor demand for Data Center assets in Naperville remains strong with recent trades at capitalization rates between 7.99% and 7.99%.

## Topography and Flood Zone

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 16 curb cuts and the property is served by municipal water and sanitary sewer.

Access to the site is provided by 18 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 2.2 acres and is generally level with frontage along Medical Center Drive. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

## Demographics and Employment

Investor demand for Data Center assets in Naperville remains strong with recent trades at capitalization rates between 5.63% and 5.63%. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Dunmore Pelican Data Campus is located in Naperville, IL, a market that has recorded 12.8% population growth over the last five years. The facility is a purpose-built data center with 22 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers. Rent growth in the submarket has averaged 7.7% annually over the past 7 years.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Rent growth in the submarket has averaged 4.5% annually over the past 8 years. Market vacancy for comparable Data Center product stands at 8.0%, down from 5.9% two years ago. Carrier-neutral meet-me room supports multiple fiber providers. Median household income within a 5-mile radius of the property is approximately $140,000 and has grown 14.0% annually.

## Access and Utilities

The site contains approximately 30.30 acres and is generally level with frontage along Medical Center Drive. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 23 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

## Building Systems

Carrier-neutral meet-me room supports multiple fiber providers. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 11 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Mechanical systems include rooftop package units and central plant equipment of varying age.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The roof is a 28-year membrane system with an estimated remaining useful life of 7 years. Common area interiors have been refreshed within the last 3 years and are in average to good condition. The facility is a purpose-built data center with 36 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting.

## Construction Details

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Dunmore Pelican Data Campus was originally constructed in 1990 and consists of 189,984 SF in a building of 22 stories. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation.

The roof is a 40-year membrane system with an estimated remaining useful life of 11 years. Dunmore Pelican Data Campus was originally constructed in 1990 and consists of 189,984 SF in a building of 12 stories. Common area interiors have been refreshed within the last 3 years and are in average to good condition. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Carrier-neutral meet-me room supports multiple fiber providers.

## Operating Performance

Carrier-neutral meet-me room supports multiple fiber providers. Operating expenses totaled $398,000 or approximately 34.93 per square foot, with real estate taxes representing the largest line item. The facility is a purpose-built data center with 19 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The going-in capitalization rate of 7.52% reflects the in-place income and the stabilized occupancy assumption.

A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. Net operating income is projected to grow at a compound annual rate of 6.2% over the hold period. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

## Financial Analysis

The going-in capitalization rate of 7.35% reflects the in-place income and the stabilized occupancy assumption. Net operating income is projected to grow at a compound annual rate of 3.4% over the hold period. Management fees are calculated at 3.6% of collected revenue and are included in operating expenses. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 21 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Debt service coverage ratio was 6.94x on a trailing basis against a covenant minimum of 1.20x.

The facility is a purpose-built data center with 19 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The going-in capitalization rate of 7.40% reflects the in-place income and the stabilized occupancy assumption. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Operating expenses totaled $181,000 or approximately 16.78 per square foot, with real estate taxes representing the largest line item. Carrier-neutral meet-me room supports multiple fiber providers.

## Financial Analysis

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Management fees are calculated at 5.6% of collected revenue and are included in operating expenses. Debt service coverage ratio was 7.36x on a trailing basis against a covenant minimum of 1.20x. The going-in capitalization rate of 5.34% reflects the in-place income and the stabilized occupancy assumption.

Net operating income is projected to grow at a compound annual rate of 5.3% over the hold period. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Debt service coverage ratio was 6.23x on a trailing basis against a covenant minimum of 1.20x. Operating expenses totaled $273,000 or approximately 6.96 per square foot, with real estate taxes representing the largest line item. Effective gross income for the trailing period was $81,000, representing a 8.2% increase over the prior year.

## Market Overview

New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. The facility is a purpose-built data center with 22 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Investor demand for Data Center assets in Naperville remains strong with recent trades at capitalization rates between 7.49% and 7.49%. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The Naperville Data Center market has experienced absorption of 4400 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Market vacancy for comparable Data Center product stands at 7.1%, down from 6.2% two years ago.

Median household income within a 6-mile radius of the property is approximately $19,000 and has grown 5.0% annually. The Naperville Data Center market has experienced absorption of 2200 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Investor demand for Data Center assets in Naperville remains strong with recent trades at capitalization rates between 6.47% and 6.47%. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

## Site Description

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 12 curb cuts and the property is served by municipal water and sanitary sewer.

Access to the site is provided by 15 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 3.3 acres and is generally level with frontage along Medical Center Drive. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

## Demographics and Employment

The Naperville Data Center market has experienced absorption of 3600 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Median household income within a 3-mile radius of the property is approximately $409,000 and has grown 10.9% annually. Market vacancy for comparable Data Center product stands at 8.9%, down from 5.9% two years ago. The facility is a purpose-built data center with 23 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Dunmore Pelican Data Campus is located in Naperville, IL, a market that has recorded 11.7% population growth over the last five years. Rent growth in the submarket has averaged 7.6% annually over the past 11 years.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Median household income within a 6-mile radius of the property is approximately $203,000 and has grown 12.7% annually. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. The facility is a purpose-built data center with 10 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Dunmore Pelican Data Campus is located in Naperville, IL, a market that has recorded 13.3% population growth over the last five years.

## Access and Utilities

### Building Systems

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Mechanical systems include rooftop package units and central plant equipment of varying age. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Dunmore Pelican Data Campus was originally constructed in 1990 and consists of 189,984 SF in a building of 46 stories. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Common area interiors have been refreshed within the last 7 years and are in average to good condition. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. The facility is a purpose-built data center with 44 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Mechanical systems include rooftop package units and central plant equipment of varying age.

### Improvements Description

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Dunmore Pelican Data Campus was originally constructed in 1990 and consists of 189,984 SF in a building of 3 stories. Common area interiors have been refreshed within the last 5 years and are in average to good condition. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Carrier-neutral meet-me room supports multiple fiber providers.

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 21 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

### Building Systems

The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The roof is a 10-year membrane system with an estimated remaining useful life of 4 years. Dunmore Pelican Data Campus was originally constructed in 1990 and consists of 189,984 SF in a building of 15 stories. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Mechanical systems include rooftop package units and central plant equipment of varying age.

## Income and Expense Review

A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Net operating income is projected to grow at a compound annual rate of 5.1% over the hold period. Carrier-neutral meet-me room supports multiple fiber providers. Effective gross income for the trailing period was $453,000, representing a 9.6% increase over the prior year. Management fees are calculated at 6.6% of collected revenue and are included in operating expenses. The facility is a purpose-built data center with 11 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. Management fees are calculated at 5.2% of collected revenue and are included in operating expenses. Operating expenses totaled $140,000 or approximately 45.16 per square foot, with real estate taxes representing the largest line item. Debt service coverage ratio was 5.84x on a trailing basis against a covenant minimum of 1.20x.

## Financial Analysis

Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 24 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Net operating income is projected to grow at a compound annual rate of 3.9% over the hold period.

A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Effective gross income for the trailing period was $319,000, representing a 2.5% increase over the prior year. Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 28 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

## Operating Performance

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Debt service coverage ratio was 6.08x on a trailing basis against a covenant minimum of 1.20x. Operating expenses totaled $317,000 or approximately 21.98 per square foot, with real estate taxes representing the largest line item. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Debt service coverage ratio was 6.03x on a trailing basis against a covenant minimum of 1.20x. Operating expenses totaled $173,000 or approximately 37.61 per square foot, with real estate taxes representing the largest line item. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. The facility is a purpose-built data center with 48 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

## Supply and Demand

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Market vacancy for comparable Data Center product stands at 13.4%, down from 3.2% two years ago. The Naperville Data Center market has experienced absorption of 4700 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Median household income within a 6-mile radius of the property is approximately $431,000 and has grown 6.1% annually. Investor demand for Data Center assets in Naperville remains strong with recent trades at capitalization rates between 7.79% and 7.79%. Dunmore Pelican Data Campus is located in Naperville, IL, a market that has recorded 2.0% population growth over the last five years.

The Naperville Data Center market has experienced absorption of 3700 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Rent growth in the submarket has averaged 3.9% annually over the past 6 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Dunmore Pelican Data Campus is located in Naperville, IL, a market that has recorded 3.0% population growth over the last five years.

## Site Description

Access to the site is provided by 19 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 7.7 acres and is generally level with frontage along Medical Center Drive.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 21.21 acres and is generally level with frontage along Medical Center Drive. Access to the site is provided by 8 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

## Demographics and Employment

The facility is a purpose-built data center with 18 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Median household income within a 5-mile radius of the property is approximately $217,000 and has grown 11.6% annually. The Naperville Data Center market has experienced absorption of 3200 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Rent growth in the submarket has averaged 3.3% annually over the past 3 years. Carrier-neutral meet-me room supports multiple fiber providers.

Rent growth in the submarket has averaged 7.5% annually over the past 7 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Employment growth is led by healthcare, logistics, education and professional services sectors. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.
