PHASE I ENVIRONMENTAL SITE ASSESSMENT

Cobalt Data Campus | Nashville, TN

Site	Cobalt Data Campus
Address	6786 Grand Street, Nashville, TN 28227
Prepared For	Sunbelt Ridge Acquisitions
Report Date	June 15, 2024
Standard	ASTM E1527-21

Access and Utilities

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 30.30 acres and is generally level with frontage along Grand Street. Access to the site is provided by 28 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Access to the site is provided by 33 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 7.7 acres and is generally level with frontage along Grand Street. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Historical Use

No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. A former dry cleaner located 9 blocks to the north is listed as a closed case and is not expected to impact the site.

Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. A former dry cleaner located 9 blocks to the north is listed as a closed case and is not expected to impact the site. No recognized environmental conditions (RECs) were identified in connection with the subject property.

Topography and Flood Zone

The site contains approximately 32.32 acres and is generally level with frontage along Grand Street. Access to the site is provided by 13 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Access to the site is provided by 24 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 14.14 acres and is generally level with frontage along Grand Street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Site Reconnaissance

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A former dry cleaner located 4 blocks to the north is listed as a closed case and is not expected to impact the site. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation. No recognized environmental conditions (RECs) were identified in connection with the subject property.
