OFFERING MEMORANDUM

Ashford Data Center | Grand Rapids, MI

Property	Ashford Data Center
Location	7471 Heritage Street, Grand Rapids, MI 60188
Property Type	Data Center
Size	352,988 SF
Year Built	2021
Offering	Unpriced - Offers Due May 5, 2024

Business Plan Progress

Distributions to investors for the quarter were paid at an annualized rate of 3.5% on contributed capital. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Carrier-neutral meet-me room supports multiple fiber providers. The business plan contemplates a hold period of 8 years with disposition upon achievement of target returns.

Carrier-neutral meet-me room supports multiple fiber providers. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Distributions to investors for the quarter were paid at an annualized rate of 7.5% on contributed capital.

Submarket Analysis

The facility is a purpose-built data center with 34 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Median household income within a 4-mile radius of the property is approximately $62,000 and has grown 12.9% annually. Market vacancy for comparable Data Center product stands at 8.0%, down from 6.5% two years ago. Employment growth is led by healthcare, logistics, education and professional services sectors. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Risk Considerations

The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. The facility is a purpose-built data center with 39 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers.

The business plan contemplates a hold period of 3 years with disposition upon achievement of target returns. Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 35 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Distributions to investors for the quarter were paid at an annualized rate of 4.0% on contributed capital.

Submarket Analysis

Market vacancy for comparable Data Center product stands at 12.4%, down from 3.5% two years ago. Rent growth in the submarket has averaged 5.8% annually over the past 12 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. Investor demand for Data Center assets in Grand Rapids remains strong with recent trades at capitalization rates between 5.26% and 5.26%.

Investment Overview

The business plan contemplates a hold period of 12 years with disposition upon achievement of target returns. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Distributions to investors for the quarter were paid at an annualized rate of 4.5% on contributed capital. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Projected levered IRR is 9.6% with an equity multiple of 1.12x over the hold period.

Projected levered IRR is 6.6% with an equity multiple of 1.15x over the hold period. Distributions to investors for the quarter were paid at an annualized rate of 4.3% on contributed capital. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. The facility is a purpose-built data center with 10 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Submarket Analysis

The Grand Rapids Data Center market has experienced absorption of 4200 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 4.6% population growth over the last five years. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Investor demand for Data Center assets in Grand Rapids remains strong with recent trades at capitalization rates between 7.57% and 7.57%. The facility is a purpose-built data center with 19 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 6.4% population growth over the last five years. The Grand Rapids Data Center market has experienced absorption of 2000 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Investor Distributions

The business plan contemplates a hold period of 8 years with disposition upon achievement of target returns. Projected levered IRR is 10.9% with an equity multiple of 1.36x over the hold period. Distributions to investors for the quarter were paid at an annualized rate of 3.7% on contributed capital. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market.

Carrier-neutral meet-me room supports multiple fiber providers. Distributions to investors for the quarter were paid at an annualized rate of 6.1% on contributed capital. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The business plan contemplates a hold period of 4 years with disposition upon achievement of target returns. Projected levered IRR is 11.2% with an equity multiple of 1.31x over the hold period.

Market Overview

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. Employment growth is led by healthcare, logistics, education and professional services sectors. The facility is a purpose-built data center with 30 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Investor demand for Data Center assets in Grand Rapids remains strong with recent trades at capitalization rates between 7.23% and 7.23%.

Employment growth is led by healthcare, logistics, education and professional services sectors. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Rent growth in the submarket has averaged 4.4% annually over the past 3 years. Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Improvements Description

The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Common area interiors have been refreshed within the last 11 years and are in average to good condition. Carrier-neutral meet-me room supports multiple fiber providers.

Common area interiors have been refreshed within the last 3 years and are in average to good condition. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The facility is a purpose-built data center with 24 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Mechanical systems include rooftop package units and central plant equipment of varying age.

Financial Analysis

Net operating income is projected to grow at a compound annual rate of 6.9% over the hold period. Carrier-neutral meet-me room supports multiple fiber providers. The going-in capitalization rate of 6.21% reflects the in-place income and the stabilized occupancy assumption. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Net operating income is projected to grow at a compound annual rate of 4.3% over the hold period. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Operating expenses totaled $270,000 or approximately 10.71 per square foot, with real estate taxes representing the largest line item. Effective gross income for the trailing period was $196,000, representing a 8.1% increase over the prior year.

Construction Details

Common area interiors have been refreshed within the last 5 years and are in average to good condition. Ashford Data Center was originally constructed in 2021 and consists of 352,988 SF in a building of 10 stories. Carrier-neutral meet-me room supports multiple fiber providers. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The facility is a purpose-built data center with 6 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Carrier-neutral meet-me room supports multiple fiber providers. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Ashford Data Center was originally constructed in 2021 and consists of 352,988 SF in a building of 31 stories. Common area interiors have been refreshed within the last 7 years and are in average to good condition. The facility is a purpose-built data center with 45 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Operating Performance

Management fees are calculated at 4.5% of collected revenue and are included in operating expenses. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. The facility is a purpose-built data center with 27 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The going-in capitalization rate of 7.61% reflects the in-place income and the stabilized occupancy assumption. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Debt service coverage ratio was 6.72x on a trailing basis against a covenant minimum of 1.20x. Operating expenses totaled $239,000 or approximately 35.84 per square foot, with real estate taxes representing the largest line item. Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Construction Details

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The roof is a 8-year membrane system with an estimated remaining useful life of 9 years. Common area interiors have been refreshed within the last 4 years and are in average to good condition. Ashford Data Center was originally constructed in 2021 and consists of 352,988 SF in a building of 25 stories. Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 28 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Property Operations

On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 14 additional team members. Service requests are tracked through a work-order system with an average completion time of 20 hours. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. The manager completes a monthly walk of the property and submits a variance report to the owner by the 14th business day.

The facility is a purpose-built data center with 46 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The manager completes a monthly walk of the property and submits a variance report to the owner by the 4th business day. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 20 additional team members.

Demographics and Employment

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Employment growth is led by healthcare, logistics, education and professional services sectors. The Grand Rapids Data Center market has experienced absorption of 3200 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Rent growth in the submarket has averaged 4.2% annually over the past 9 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Investor demand for Data Center assets in Grand Rapids remains strong with recent trades at capitalization rates between 7.39% and 7.39%.

Rent growth in the submarket has averaged 6.3% annually over the past 5 years. Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 4.6% population growth over the last five years. Median household income within a 3-mile radius of the property is approximately $450,000 and has grown 4.6% annually. Investor demand for Data Center assets in Grand Rapids remains strong with recent trades at capitalization rates between 7.92% and 7.92%. Market vacancy for comparable Data Center product stands at 6.2%, down from 3.6% two years ago. The Grand Rapids Data Center market has experienced absorption of 2700 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

Property Operations

The manager completes a monthly walk of the property and submits a variance report to the owner by the 35th business day. Carrier-neutral meet-me room supports multiple fiber providers. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 24 additional team members. Service requests are tracked through a work-order system with an average completion time of 6 hours.

Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 31 additional team members. Service requests are tracked through a work-order system with an average completion time of 44 hours. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period.

Submarket Analysis

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Market vacancy for comparable Data Center product stands at 6.1%, down from 5.9% two years ago. Median household income within a 1-mile radius of the property is approximately $55,000 and has grown 9.7% annually. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 10.1% population growth over the last five years. Rent growth in the submarket has averaged 5.4% annually over the past 9 years. The Grand Rapids Data Center market has experienced absorption of 1600 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. The facility is a purpose-built data center with 20 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Market vacancy for comparable Data Center product stands at 5.9%, down from 3.1% two years ago.

Leasing and Marketing

Carrier-neutral meet-me room supports multiple fiber providers. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Collections for the period were 96.0% of billed charges, with bad debt of 5.8% of gross potential income. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period.

FICTITIOUS SAMPLE DOCUMENT — all names, figures and entities are invented for classroom training use only

Investor Distributions

Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Projected levered IRR is 9.3% with an equity multiple of 1.30x over the hold period. The facility is a purpose-built data center with 17 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The business plan contemplates a hold period of 9 years with disposition upon achievement of target returns.

Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Projected levered IRR is 10.8% with an equity multiple of 1.42x over the hold period. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Submarket Analysis

Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 13.2% population growth over the last five years. Rent growth in the submarket has averaged 3.7% annually over the past 4 years. Employment growth is led by healthcare, logistics, education and professional services sectors. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 26 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Rent growth in the submarket has averaged 3.7% annually over the past 5 years. Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 11.1% population growth over the last five years. Median household income within a 8-mile radius of the property is approximately $204,000 and has grown 10.5% annually. The facility is a purpose-built data center with 16 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The Grand Rapids Data Center market has experienced absorption of 1000 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

Risk Considerations

Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The facility is a purpose-built data center with 8 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Projected levered IRR is 6.2% with an equity multiple of 1.29x over the hold period. Carrier-neutral meet-me room supports multiple fiber providers. The business plan contemplates a hold period of 8 years with disposition upon achievement of target returns.

Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. The business plan contemplates a hold period of 9 years with disposition upon achievement of target returns. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Demographics and Employment

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Investor demand for Data Center assets in Grand Rapids remains strong with recent trades at capitalization rates between 8.03% and 8.03%. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 3.8% population growth over the last five years.

The facility is a purpose-built data center with 25 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Market vacancy for comparable Data Center product stands at 4.6%, down from 6.5% two years ago. Employment growth is led by healthcare, logistics, education and professional services sectors. The Grand Rapids Data Center market has experienced absorption of 200 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Rent growth in the submarket has averaged 6.5% annually over the past 4 years. Carrier-neutral meet-me room supports multiple fiber providers.

Improvements Description

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The roof is a 32-year membrane system with an estimated remaining useful life of 12 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. Common area interiors have been refreshed within the last 5 years and are in average to good condition.

Mechanical systems include rooftop package units and central plant equipment of varying age. Common area interiors have been refreshed within the last 9 years and are in average to good condition. Carrier-neutral meet-me room supports multiple fiber providers. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Income and Expense Review

Carrier-neutral meet-me room supports multiple fiber providers. Net operating income is projected to grow at a compound annual rate of 4.1% over the hold period. Effective gross income for the trailing period was $189,000, representing a 4.0% increase over the prior year. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The going-in capitalization rate of 7.43% reflects the in-place income and the stabilized occupancy assumption. Management fees are calculated at 6.6% of collected revenue and are included in operating expenses.

Effective gross income for the trailing period was $96,000, representing a 5.3% increase over the prior year. Net operating income is projected to grow at a compound annual rate of 6.0% over the hold period. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Improvements Description

Mechanical systems include rooftop package units and central plant equipment of varying age. Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The roof is a 30-year membrane system with an estimated remaining useful life of 9 years. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Common area interiors have been refreshed within the last 5 years and are in average to good condition.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The roof is a 40-year membrane system with an estimated remaining useful life of 5 years. The facility is a purpose-built data center with 41 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Ashford Data Center was originally constructed in 2021 and consists of 352,988 SF in a building of 14 stories. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Operating Performance

Management fees are calculated at 5.4% of collected revenue and are included in operating expenses. Operating expenses totaled $142,000 or approximately 20.53 per square foot, with real estate taxes representing the largest line item. The going-in capitalization rate of 5.47% reflects the in-place income and the stabilized occupancy assumption. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Debt service coverage ratio was 7.56x on a trailing basis against a covenant minimum of 1.20x.

Debt service coverage ratio was 7.42x on a trailing basis against a covenant minimum of 1.20x. Management fees are calculated at 4.6% of collected revenue and are included in operating expenses. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Net operating income is projected to grow at a compound annual rate of 4.4% over the hold period.

Building Systems

The roof is a 28-year membrane system with an estimated remaining useful life of 4 years. The facility is a purpose-built data center with 46 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Ashford Data Center was originally constructed in 2021 and consists of 352,988 SF in a building of 10 stories. Common area interiors have been refreshed within the last 7 years and are in average to good condition. Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Leasing and Marketing

Collections for the period were 94.3% of billed charges, with bad debt of 3.9% of gross potential income. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 9 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The manager completes a monthly walk of the property and submits a variance report to the owner by the 48th business day. Carrier-neutral meet-me room supports multiple fiber providers. Collections for the period were 92.0% of billed charges, with bad debt of 4.2% of gross potential income.

Submarket Analysis

Market vacancy for comparable Data Center product stands at 7.6%, down from 3.8% two years ago. Rent growth in the submarket has averaged 5.2% annually over the past 9 years. The Grand Rapids Data Center market has experienced absorption of 4400 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Median household income within a 8-mile radius of the property is approximately $294,000 and has grown 2.9% annually.

Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 7.0% population growth over the last five years. Carrier-neutral meet-me room supports multiple fiber providers. Investor demand for Data Center assets in Grand Rapids remains strong with recent trades at capitalization rates between 6.20% and 6.20%. Rent growth in the submarket has averaged 3.1% annually over the past 5 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Leasing and Marketing

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Collections for the period were 89.2% of billed charges, with bad debt of 5.2% of gross potential income. The manager completes a monthly walk of the property and submits a variance report to the owner by the 46th business day.

On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 5 additional team members. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Service requests are tracked through a work-order system with an average completion time of 25 hours. The facility is a purpose-built data center with 27 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Demographics and Employment

Rent growth in the submarket has averaged 5.7% annually over the past 3 years. Investor demand for Data Center assets in Grand Rapids remains strong with recent trades at capitalization rates between 5.92% and 5.92%. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

The facility is a purpose-built data center with 23 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Market vacancy for comparable Data Center product stands at 11.6%, down from 7.0% two years ago. Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 8.8% population growth over the last five years. Employment growth is led by healthcare, logistics, education and professional services sectors.

Management Commentary

Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Collections for the period were 92.7% of billed charges, with bad debt of 8.0% of gross potential income. Carrier-neutral meet-me room supports multiple fiber providers. The manager completes a monthly walk of the property and submits a variance report to the owner by the 23th business day.

Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 27 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Collections for the period were 88.0% of billed charges, with bad debt of 6.1% of gross potential income.

Investor Distributions

Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Projected levered IRR is 10.8% with an equity multiple of 1.12x over the hold period. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The facility is a purpose-built data center with 8 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The business plan contemplates a hold period of 9 years with disposition upon achievement of target returns.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Distributions to investors for the quarter were paid at an annualized rate of 7.8% on contributed capital. The business plan contemplates a hold period of 7 years with disposition upon achievement of target returns. The facility is a purpose-built data center with 4 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Supply and Demand

Employment growth is led by healthcare, logistics, education and professional services sectors. Rent growth in the submarket has averaged 7.1% annually over the past 8 years. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 5.2% population growth over the last five years. Investor demand for Data Center assets in Grand Rapids remains strong with recent trades at capitalization rates between 6.25% and 6.25%.

Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 7.3% population growth over the last five years. Employment growth is led by healthcare, logistics, education and professional services sectors. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The Grand Rapids Data Center market has experienced absorption of 2100 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Investor demand for Data Center assets in Grand Rapids remains strong with recent trades at capitalization rates between 7.08% and 7.08%.

Business Plan Progress

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. The business plan contemplates a hold period of 11 years with disposition upon achievement of target returns. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions.

Projected levered IRR is 4.2% with an equity multiple of 1.26x over the hold period. The facility is a purpose-built data center with 35 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. The business plan contemplates a hold period of 12 years with disposition upon achievement of target returns.

Supply and Demand

The facility is a purpose-built data center with 16 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Investor demand for Data Center assets in Grand Rapids remains strong with recent trades at capitalization rates between 6.18% and 6.18%. The Grand Rapids Data Center market has experienced absorption of 2800 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Ashford Data Center is located in Grand Rapids, MI, a market that has recorded 8.6% population growth over the last five years.

Employment growth is led by healthcare, logistics, education and professional services sectors. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. Rent growth in the submarket has averaged 5.7% annually over the past 4 years. The Grand Rapids Data Center market has experienced absorption of 2600 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

Improvements Description

Mechanical systems include rooftop package units and central plant equipment of varying age. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation.

The roof is a 36-year membrane system with an estimated remaining useful life of 4 years. The facility is a purpose-built data center with 4 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation.

Financial Analysis

A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. The going-in capitalization rate of 5.50% reflects the in-place income and the stabilized occupancy assumption. Effective gross income for the trailing period was $74,000, representing a 5.1% increase over the prior year. The facility is a purpose-built data center with 47 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Net operating income is projected to grow at a compound annual rate of 3.7% over the hold period.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Debt service coverage ratio was 8.14x on a trailing basis against a covenant minimum of 1.20x. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. The going-in capitalization rate of 6.49% reflects the in-place income and the stabilized occupancy assumption. Net operating income is projected to grow at a compound annual rate of 6.6% over the hold period.

Improvements Description

Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Carrier-neutral meet-me room supports multiple fiber providers. Mechanical systems include rooftop package units and central plant equipment of varying age. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

The facility is a purpose-built data center with 18 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers. Common area interiors have been refreshed within the last 6 years and are in average to good condition. Mechanical systems include rooftop package units and central plant equipment of varying age. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting.

Financial Analysis

Debt service coverage ratio was 6.31x on a trailing basis against a covenant minimum of 1.20x. The going-in capitalization rate of 7.19% reflects the in-place income and the stabilized occupancy assumption. Operating expenses totaled $51,000 or approximately 20.76 per square foot, with real estate taxes representing the largest line item. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 16 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Effective gross income for the trailing period was $117,000, representing a 4.9% increase over the prior year.

Effective gross income for the trailing period was $418,000, representing a 13.8% increase over the prior year. The facility is a purpose-built data center with 5 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The going-in capitalization rate of 6.28% reflects the in-place income and the stabilized occupancy assumption. Operating expenses totaled $277,000 or approximately 28.41 per square foot, with real estate taxes representing the largest line item. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Net operating income is projected to grow at a compound annual rate of 6.8% over the hold period.

Construction Details

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.
