PHASE I ENVIRONMENTAL SITE ASSESSMENT

Canyon Saddlebrook Data Campus | Pittsburgh, PA

Site	Canyon Saddlebrook Data Campus
Address	4766 Sunset Drive, Pittsburgh, PA 79909
Prepared For	Juniper Peak Real Estate Fund
Report Date	January 10, 2024
Standard	ASTM E1527-21

Topography and Flood Zone

Access to the site is provided by 11 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 26.26 acres and is generally level with frontage along Sunset Drive. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 15 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 19.19 acres and is generally level with frontage along Sunset Drive. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Findings and Opinions

No recognized environmental conditions (RECs) were identified in connection with the subject property. A former dry cleaner located 5 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

Vapor encroachment screening did not identify a condition requiring further evaluation. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 7 blocks to the north is listed as a closed case and is not expected to impact the site. No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.

Access and Utilities

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 32 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 38.38 acres and is generally level with frontage along Sunset Drive.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 48.48 acres and is generally level with frontage along Sunset Drive. Access to the site is provided by 28 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Site Reconnaissance

Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. A former dry cleaner located 5 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.

Site Description

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 38 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 11.11 acres and is generally level with frontage along Sunset Drive. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 24.24 acres and is generally level with frontage along Sunset Drive. Access to the site is provided by 2 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Site Reconnaissance

Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A former dry cleaner located 7 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.

Historical sources indicate the site was previously used for agricultural and light commercial purposes. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Vapor encroachment screening did not identify a condition requiring further evaluation. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Site Description

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 9 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 38.38 acres and is generally level with frontage along Sunset Drive.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 14.14 acres and is generally level with frontage along Sunset Drive. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 14 curb cuts and the property is served by municipal water and sanitary sewer.

Records Review

No recognized environmental conditions (RECs) were identified in connection with the subject property. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 4 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Vapor encroachment screening did not identify a condition requiring further evaluation. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No recognized environmental conditions (RECs) were identified in connection with the subject property. A former dry cleaner located 6 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Access and Utilities

Access to the site is provided by 16 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 48.48 acres and is generally level with frontage along Sunset Drive. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 43.43 acres and is generally level with frontage along Sunset Drive. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Findings and Opinions

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No recognized environmental conditions (RECs) were identified in connection with the subject property. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Vapor encroachment screening did not identify a condition requiring further evaluation. Historical sources indicate the site was previously used for agricultural and light commercial purposes.

A former dry cleaner located 3 blocks to the north is listed as a closed case and is not expected to impact the site. Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.
