APPRAISAL REPORT

Timberline Everett Data Campus | Boise, ID

Subject Property	Timberline Everett Data Campus
Address	8053 Meadow Street, Boise, ID 26258
Property Rights Appraised	Fee Simple
Effective Date of Value	May 9, 2020
Market Value Conclusion	$236,600,000

Submarket Analysis

The facility is a purpose-built data center with 40 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Median household income within a 3-mile radius of the property is approximately $429,000 and has grown 8.0% annually. Investor demand for Data Center assets in Boise remains strong with recent trades at capitalization rates between 7.57% and 7.57%. Timberline Everett Data Campus is located in Boise, ID, a market that has recorded 7.3% population growth over the last five years.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Timberline Everett Data Campus is located in Boise, ID, a market that has recorded 2.8% population growth over the last five years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Investor demand for Data Center assets in Boise remains strong with recent trades at capitalization rates between 6.02% and 6.02%. Market vacancy for comparable Data Center product stands at 11.5%, down from 4.8% two years ago.

Site Description

The site contains approximately 47.47 acres and is generally level with frontage along Meadow Street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 10.10 acres and is generally level with frontage along Meadow Street.

Market Overview

Timberline Everett Data Campus is located in Boise, ID, a market that has recorded 6.5% population growth over the last five years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Rent growth in the submarket has averaged 4.0% annually over the past 12 years. Carrier-neutral meet-me room supports multiple fiber providers. Market vacancy for comparable Data Center product stands at 5.6%, down from 4.4% two years ago.

The facility is a purpose-built data center with 43 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Timberline Everett Data Campus is located in Boise, ID, a market that has recorded 3.5% population growth over the last five years. Market vacancy for comparable Data Center product stands at 12.7%, down from 6.4% two years ago. Median household income within a 6-mile radius of the property is approximately $196,000 and has grown 11.7% annually. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Topography and Flood Zone

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 4.4 acres and is generally level with frontage along Meadow Street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 17 curb cuts and the property is served by municipal water and sanitary sewer.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 18.18 acres and is generally level with frontage along Meadow Street. Access to the site is provided by 3 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Demographics and Employment

Carrier-neutral meet-me room supports multiple fiber providers. The Boise Data Center market has experienced absorption of 700 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Investor demand for Data Center assets in Boise remains strong with recent trades at capitalization rates between 7.90% and 7.90%. Timberline Everett Data Campus is located in Boise, ID, a market that has recorded 5.5% population growth over the last five years. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Employment growth is led by healthcare, logistics, education and professional services sectors. Timberline Everett Data Campus is located in Boise, ID, a market that has recorded 9.4% population growth over the last five years. The facility is a purpose-built data center with 30 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Access and Utilities

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 48 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

The site contains approximately 39.39 acres and is generally level with frontage along Meadow Street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 39 curb cuts and the property is served by municipal water and sanitary sewer.

Supply and Demand

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Market vacancy for comparable Data Center product stands at 10.3%, down from 3.6% two years ago. Investor demand for Data Center assets in Boise remains strong with recent trades at capitalization rates between 7.73% and 7.73%.

The facility is a purpose-built data center with 2 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Median household income within a 4-mile radius of the property is approximately $450,000 and has grown 6.5% annually. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Rent growth in the submarket has averaged 4.8% annually over the past 6 years. Carrier-neutral meet-me room supports multiple fiber providers. Market vacancy for comparable Data Center product stands at 8.3%, down from 6.1% two years ago.

Access and Utilities

Access to the site is provided by 47 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 43.43 acres and is generally level with frontage along Meadow Street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 41 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Submarket Analysis

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Median household income within a 7-mile radius of the property is approximately $55,000 and has grown 12.4% annually. The facility is a purpose-built data center with 30 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Employment growth is led by healthcare, logistics, education and professional services sectors.

Construction Details

Timberline Everett Data Campus was originally constructed in 2023 and consists of 207,000 SF in a building of 29 stories. Mechanical systems include rooftop package units and central plant equipment of varying age. Carrier-neutral meet-me room supports multiple fiber providers. Common area interiors have been refreshed within the last 6 years and are in average to good condition. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting.

Timberline Everett Data Campus was originally constructed in 2023 and consists of 207,000 SF in a building of 28 stories. The roof is a 5-year membrane system with an estimated remaining useful life of 3 years. Common area interiors have been refreshed within the last 3 years and are in average to good condition. Mechanical systems include rooftop package units and central plant equipment of varying age. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The facility is a purpose-built data center with 22 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Improvements Description

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Common area interiors have been refreshed within the last 9 years and are in average to good condition. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition.

The facility is a purpose-built data center with 27 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The roof is a 38-year membrane system with an estimated remaining useful life of 9 years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Improvements Description

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Timberline Everett Data Campus was originally constructed in 2023 and consists of 207,000 SF in a building of 3 stories. Mechanical systems include rooftop package units and central plant equipment of varying age. Carrier-neutral meet-me room supports multiple fiber providers.

Operating Performance

Carrier-neutral meet-me room supports multiple fiber providers. Management fees are calculated at 5.3% of collected revenue and are included in operating expenses. Net operating income is projected to grow at a compound annual rate of 3.4% over the hold period. Effective gross income for the trailing period was $194,000, representing a 10.3% increase over the prior year.

The going-in capitalization rate of 6.95% reflects the in-place income and the stabilized occupancy assumption. Debt service coverage ratio was 5.67x on a trailing basis against a covenant minimum of 1.20x. Effective gross income for the trailing period was $478,000, representing a 13.8% increase over the prior year. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income.

Financial Analysis

The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Operating expenses totaled $470,000 or approximately 46.33 per square foot, with real estate taxes representing the largest line item. Net operating income is projected to grow at a compound annual rate of 6.6% over the hold period. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. The going-in capitalization rate of 5.28% reflects the in-place income and the stabilized occupancy assumption. Management fees are calculated at 7.8% of collected revenue and are included in operating expenses.

A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Operating expenses totaled $101,000 or approximately 38.93 per square foot, with real estate taxes representing the largest line item. Effective gross income for the trailing period was $357,000, representing a 13.0% increase over the prior year. Debt service coverage ratio was 6.99x on a trailing basis against a covenant minimum of 1.20x. Net operating income is projected to grow at a compound annual rate of 6.1% over the hold period. The facility is a purpose-built data center with 29 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Valuation Discussion

Net operating income is projected to grow at a compound annual rate of 7.4% over the hold period. Management fees are calculated at 3.6% of collected revenue and are included in operating expenses. Effective gross income for the trailing period was $183,000, representing a 13.7% increase over the prior year. Operating expenses totaled $336,000 or approximately 29.27 per square foot, with real estate taxes representing the largest line item. The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Debt service coverage ratio was 7.39x on a trailing basis against a covenant minimum of 1.20x. Management fees are calculated at 6.0% of collected revenue and are included in operating expenses. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Market Overview

The Boise Data Center market has experienced absorption of 1500 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Median household income within a 9-mile radius of the property is approximately $325,000 and has grown 11.9% annually. Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 13 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

The facility is a purpose-built data center with 31 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Median household income within a 3-mile radius of the property is approximately $470,000 and has grown 13.8% annually. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Investor demand for Data Center assets in Boise remains strong with recent trades at capitalization rates between 6.33% and 6.33%.

Topography and Flood Zone

The site contains approximately 40.40 acres and is generally level with frontage along Meadow Street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

The site contains approximately 28.28 acres and is generally level with frontage along Meadow Street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 40 curb cuts and the property is served by municipal water and sanitary sewer.

Submarket Analysis

New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Timberline Everett Data Campus is located in Boise, ID, a market that has recorded 4.1% population growth over the last five years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Employment growth is led by healthcare, logistics, education and professional services sectors.

Access and Utilities

Access to the site is provided by 38 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 41.41 acres and is generally level with frontage along Meadow Street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 33 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Market Overview

Market vacancy for comparable Data Center product stands at 13.0%, down from 5.1% two years ago. The facility is a purpose-built data center with 9 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Median household income within a 7-mile radius of the property is approximately $451,000 and has grown 3.8% annually. Carrier-neutral meet-me room supports multiple fiber providers. Rent growth in the submarket has averaged 4.2% annually over the past 7 years.

Building Systems

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The roof is a 18-year membrane system with an estimated remaining useful life of 6 years. Timberline Everett Data Campus was originally constructed in 2023 and consists of 207,000 SF in a building of 30 stories.

Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The facility is a purpose-built data center with 36 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The roof is a 24-year membrane system with an estimated remaining useful life of 3 years. Mechanical systems include rooftop package units and central plant equipment of varying age.

Improvements Description

Timberline Everett Data Campus was originally constructed in 2023 and consists of 207,000 SF in a building of 15 stories. The roof is a 31-year membrane system with an estimated remaining useful life of 10 years. Common area interiors have been refreshed within the last 9 years and are in average to good condition. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Mechanical systems include rooftop package units and central plant equipment of varying age.

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The roof is a 24-year membrane system with an estimated remaining useful life of 4 years. Common area interiors have been refreshed within the last 6 years and are in average to good condition. The facility is a purpose-built data center with 31 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Income and Expense Review

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Debt service coverage ratio was 5.03x on a trailing basis against a covenant minimum of 1.20x. Effective gross income for the trailing period was $461,000, representing a 11.3% increase over the prior year. Management fees are calculated at 7.5% of collected revenue and are included in operating expenses. The facility is a purpose-built data center with 37 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The going-in capitalization rate of 5.05% reflects the in-place income and the stabilized occupancy assumption.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 4 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The going-in capitalization rate of 6.39% reflects the in-place income and the stabilized occupancy assumption. Operating expenses totaled $396,000 or approximately 30.86 per square foot, with real estate taxes representing the largest line item. Debt service coverage ratio was 5.65x on a trailing basis against a covenant minimum of 1.20x.

Valuation Discussion

Net operating income is projected to grow at a compound annual rate of 6.7% over the hold period. Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Debt service coverage ratio was 8.12x on a trailing basis against a covenant minimum of 1.20x. Operating expenses totaled $119,000 or approximately 17.03 per square foot, with real estate taxes representing the largest line item.

Operating expenses totaled $83,000 or approximately 6.36 per square foot, with real estate taxes representing the largest line item. The going-in capitalization rate of 5.30% reflects the in-place income and the stabilized occupancy assumption. Effective gross income for the trailing period was $171,000, representing a 2.4% increase over the prior year. Carrier-neutral meet-me room supports multiple fiber providers.

Valuation Discussion

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. The facility is a purpose-built data center with 37 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Operating expenses totaled $283,000 or approximately 35.31 per square foot, with real estate taxes representing the largest line item.

The going-in capitalization rate of 6.45% reflects the in-place income and the stabilized occupancy assumption. Debt service coverage ratio was 6.24x on a trailing basis against a covenant minimum of 1.20x. Net operating income is projected to grow at a compound annual rate of 6.2% over the hold period. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Management fees are calculated at 3.9% of collected revenue and are included in operating expenses.

FICTITIOUS SAMPLE DOCUMENT — all names, figures and entities are invented for classroom training use only

Market Overview

The facility is a purpose-built data center with 15 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Market vacancy for comparable Data Center product stands at 6.8%, down from 3.6% two years ago. Median household income within a 2-mile radius of the property is approximately $120,000 and has grown 12.7% annually. Investor demand for Data Center assets in Boise remains strong with recent trades at capitalization rates between 5.67% and 5.67%. Rent growth in the submarket has averaged 6.7% annually over the past 7 years.

Rent growth in the submarket has averaged 5.8% annually over the past 5 years. Market vacancy for comparable Data Center product stands at 3.3%, down from 4.9% two years ago. The Boise Data Center market has experienced absorption of 300 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Site Description

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 7 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

The site contains approximately 37.37 acres and is generally level with frontage along Meadow Street. Access to the site is provided by 17 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Submarket Analysis

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Investor demand for Data Center assets in Boise remains strong with recent trades at capitalization rates between 6.04% and 6.04%. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Carrier-neutral meet-me room supports multiple fiber providers. Employment growth is led by healthcare, logistics, education and professional services sectors.

Investor demand for Data Center assets in Boise remains strong with recent trades at capitalization rates between 5.81% and 5.81%. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Median household income within a 9-mile radius of the property is approximately $254,000 and has grown 11.6% annually. Carrier-neutral meet-me room supports multiple fiber providers. Market vacancy for comparable Data Center product stands at 8.1%, down from 6.3% two years ago. The Boise Data Center market has experienced absorption of 2800 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

Access and Utilities

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 43 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 34 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Market Overview

The facility is a purpose-built data center with 41 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Timberline Everett Data Campus is located in Boise, ID, a market that has recorded 5.1% population growth over the last five years. The Boise Data Center market has experienced absorption of 200 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Employment growth is led by healthcare, logistics, education and professional services sectors.

Building Systems

Mechanical systems include rooftop package units and central plant equipment of varying age. Carrier-neutral meet-me room supports multiple fiber providers. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Timberline Everett Data Campus was originally constructed in 2023 and consists of 207,000 SF in a building of 37 stories.

Timberline Everett Data Campus was originally constructed in 2023 and consists of 207,000 SF in a building of 16 stories. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Mechanical systems include rooftop package units and central plant equipment of varying age. Carrier-neutral meet-me room supports multiple fiber providers. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Construction Details

The roof is a 34-year membrane system with an estimated remaining useful life of 12 years. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

The facility is a purpose-built data center with 45 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers. Mechanical systems include rooftop package units and central plant equipment of varying age. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting.

Construction Details

Timberline Everett Data Campus was originally constructed in 2023 and consists of 207,000 SF in a building of 6 stories. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. The roof is a 37-year membrane system with an estimated remaining useful life of 4 years. Carrier-neutral meet-me room supports multiple fiber providers. Mechanical systems include rooftop package units and central plant equipment of varying age.

Common area interiors have been refreshed within the last 10 years and are in average to good condition. Mechanical systems include rooftop package units and central plant equipment of varying age. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The roof is a 20-year membrane system with an estimated remaining useful life of 4 years.
