PHASE I ENVIRONMENTAL SITE ASSESSMENT

Union Assisted Living | Dallas, TX

Site	Union Assisted Living
Address	7471 Bridge Boulevard, Dallas, TX 30917
Prepared For	Granite Lane Realty
Report Date	January 10, 2022
Standard	ASTM E1527-21

Access and Utilities

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 8.8 acres and is generally level with frontage along Bridge Boulevard. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 18 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 5.5 acres and is generally level with frontage along Bridge Boulevard. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Findings and Opinions

Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 2 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 1 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation.

Topography and Flood Zone

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 32 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 48.48 acres and is generally level with frontage along Bridge Boulevard. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 23.23 acres and is generally level with frontage along Bridge Boulevard. Access to the site is provided by 20 curb cuts and the property is served by municipal water and sanitary sewer.

Findings and Opinions

Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No recognized environmental conditions (RECs) were identified in connection with the subject property. Vapor encroachment screening did not identify a condition requiring further evaluation. Historical sources indicate the site was previously used for agricultural and light commercial purposes.

Access and Utilities

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 10 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

The site contains approximately 24.24 acres and is generally level with frontage along Bridge Boulevard. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 21 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Records Review

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A former dry cleaner located 2 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No recognized environmental conditions (RECs) were identified in connection with the subject property.

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Access and Utilities

The site contains approximately 42.42 acres and is generally level with frontage along Bridge Boulevard. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 44 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Access to the site is provided by 39 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Findings and Opinions

Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A former dry cleaner located 1 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.

Site Description

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 41.41 acres and is generally level with frontage along Bridge Boulevard. Access to the site is provided by 21 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Records Review

Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No recognized environmental conditions (RECs) were identified in connection with the subject property.

Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A former dry cleaner located 9 blocks to the north is listed as a closed case and is not expected to impact the site. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Historical sources indicate the site was previously used for agricultural and light commercial purposes.

Records Review

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances.
