PHASE I ENVIRONMENTAL SITE ASSESSMENT

Banyan Heritage Rental Homes | Seattle, WA

Site	Banyan Heritage Rental Homes
Address	1426 Commerce Way, Seattle, WA 61286
Prepared For	Sunbelt Ridge Acquisitions
Report Date	July 8, 2023
Standard	ASTM E1527-21

Site Description

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 27.27 acres and is generally level with frontage along Commerce Way. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 9.9 acres and is generally level with frontage along Commerce Way. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Findings and Opinions

Historical sources indicate the site was previously used for agricultural and light commercial purposes. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. A former dry cleaner located 3 blocks to the north is listed as a closed case and is not expected to impact the site. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. No recognized environmental conditions (RECs) were identified in connection with the subject property.

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 3 blocks to the north is listed as a closed case and is not expected to impact the site.

Site Description

The site contains approximately 17.17 acres and is generally level with frontage along Commerce Way. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 31 curb cuts and the property is served by municipal water and sanitary sewer.

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 46 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 36.36 acres and is generally level with frontage along Commerce Way.

Historical Use

No recognized environmental conditions (RECs) were identified in connection with the subject property. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 5 blocks to the north is listed as a closed case and is not expected to impact the site.

Site Description

The site contains approximately 3.3 acres and is generally level with frontage along Commerce Way. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 21 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Historical Use

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Vapor encroachment screening did not identify a condition requiring further evaluation. A former dry cleaner located 8 blocks to the north is listed as a closed case and is not expected to impact the site. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials.

A former dry cleaner located 1 blocks to the north is listed as a closed case and is not expected to impact the site. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes. Vapor encroachment screening did not identify a condition requiring further evaluation. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Access and Utilities

Access to the site is provided by 19 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 39 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 36.36 acres and is generally level with frontage along Commerce Way. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Site Reconnaissance

No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No recognized environmental conditions (RECs) were identified in connection with the subject property. Vapor encroachment screening did not identify a condition requiring further evaluation.

Historical sources indicate the site was previously used for agricultural and light commercial purposes. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. No recognized environmental conditions (RECs) were identified in connection with the subject property. A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance.

Access and Utilities

The site contains approximately 4.4 acres and is generally level with frontage along Commerce Way. Access to the site is provided by 10 curb cuts and the property is served by municipal water and sanitary sewer. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Records Review

A review of regulatory databases identified no listings for the subject property within the ASTM-specified search distances. No evidence of underground storage tanks, stained soils or stressed vegetation was observed during the site reconnaissance. Based on the age of construction, an asbestos operations and maintenance program is recommended for suspect materials. Historical sources indicate the site was previously used for agricultural and light commercial purposes. A former dry cleaner located 4 blocks to the north is listed as a closed case and is not expected to impact the site.
