APPRAISAL REPORT

Canyon Saddlebrook Data Campus | Pittsburgh, PA

Subject Property	Canyon Saddlebrook Data Campus
Address	4766 Sunset Drive, Pittsburgh, PA 79909
Property Rights Appraised	Fee Simple
Effective Date of Value	November 3, 2023
Market Value Conclusion	$425,020,000

Submarket Analysis

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. The Pittsburgh Data Center market has experienced absorption of 900 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Median household income within a 6-mile radius of the property is approximately $127,000 and has grown 9.1% annually. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 8.5% population growth over the last five years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Median household income within a 2-mile radius of the property is approximately $298,000 and has grown 10.6% annually. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Employment growth is led by healthcare, logistics, education and professional services sectors.

Access and Utilities

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 29.29 acres and is generally level with frontage along Sunset Drive. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 3 curb cuts and the property is served by municipal water and sanitary sewer.

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 44 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site contains approximately 31.31 acres and is generally level with frontage along Sunset Drive.

Submarket Analysis

Employment growth is led by healthcare, logistics, education and professional services sectors. Rent growth in the submarket has averaged 4.3% annually over the past 10 years. The Pittsburgh Data Center market has experienced absorption of 2300 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Market vacancy for comparable Data Center product stands at 8.8%, down from 4.1% two years ago.

Demographics and Employment

New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 8.9% population growth over the last five years. The facility is a purpose-built data center with 25 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The Pittsburgh Data Center market has experienced absorption of 2300 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 5.63% and 5.63%. Carrier-neutral meet-me room supports multiple fiber providers.

Median household income within a 3-mile radius of the property is approximately $26,000 and has grown 10.8% annually. The Pittsburgh Data Center market has experienced absorption of 2100 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 5.56% and 5.56%. Rent growth in the submarket has averaged 5.1% annually over the past 7 years.

Site Description

The site contains approximately 34.34 acres and is generally level with frontage along Sunset Drive. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 44 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

The site contains approximately 19.19 acres and is generally level with frontage along Sunset Drive. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 39 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Submarket Analysis

Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 6.38% and 6.38%. The Pittsburgh Data Center market has experienced absorption of 3500 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Rent growth in the submarket has averaged 5.0% annually over the past 7 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers.

New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Rent growth in the submarket has averaged 3.3% annually over the past 10 years. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 13.6% population growth over the last five years. Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 5.22% and 5.22%. The facility is a purpose-built data center with 8 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Topography and Flood Zone

FICTITIOUS SAMPLE DOCUMENT — all names, figures and entities are invented for classroom training use only

Improvements Description

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Common area interiors have been refreshed within the last 9 years and are in average to good condition. Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 9 stories. Mechanical systems include rooftop package units and central plant equipment of varying age. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The roof is a 48-year membrane system with an estimated remaining useful life of 6 years.

The roof is a 38-year membrane system with an estimated remaining useful life of 11 years. Carrier-neutral meet-me room supports multiple fiber providers. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation.

Construction Details

The facility is a purpose-built data center with 44 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 20 stories. Mechanical systems include rooftop package units and central plant equipment of varying age. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation.

Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Common area interiors have been refreshed within the last 11 years and are in average to good condition. Mechanical systems include rooftop package units and central plant equipment of varying age.

Building Systems

The facility is a purpose-built data center with 11 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Common area interiors have been refreshed within the last 9 years and are in average to good condition. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation.

Valuation Discussion

Debt service coverage ratio was 6.28x on a trailing basis against a covenant minimum of 1.20x. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Operating expenses totaled $388,000 or approximately 37.08 per square foot, with real estate taxes representing the largest line item. The going-in capitalization rate of 5.32% reflects the in-place income and the stabilized occupancy assumption.

Net operating income is projected to grow at a compound annual rate of 6.7% over the hold period. The facility is a purpose-built data center with 9 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Effective gross income for the trailing period was $240,000, representing a 4.1% increase over the prior year. Carrier-neutral meet-me room supports multiple fiber providers. Debt service coverage ratio was 5.32x on a trailing basis against a covenant minimum of 1.20x.

Operating Performance

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Operating expenses totaled $253,000 or approximately 13.07 per square foot, with real estate taxes representing the largest line item. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Effective gross income for the trailing period was $442,000, representing a 13.0% increase over the prior year. The facility is a purpose-built data center with 48 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Management fees are calculated at 4.9% of collected revenue and are included in operating expenses. The facility is a purpose-built data center with 30 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Debt service coverage ratio was 5.78x on a trailing basis against a covenant minimum of 1.20x. Effective gross income for the trailing period was $238,000, representing a 12.4% increase over the prior year. Operating expenses totaled $409,000 or approximately 45.37 per square foot, with real estate taxes representing the largest line item. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income.

Financial Analysis

A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 20 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Net operating income is projected to grow at a compound annual rate of 6.0% over the hold period.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Effective gross income for the trailing period was $373,000, representing a 7.0% increase over the prior year. Net operating income is projected to grow at a compound annual rate of 6.8% over the hold period. The facility is a purpose-built data center with 10 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Management fees are calculated at 4.4% of collected revenue and are included in operating expenses. Operating expenses totaled $424,000 or approximately 31.67 per square foot, with real estate taxes representing the largest line item.

Submarket Analysis

The facility is a purpose-built data center with 13 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Median household income within a 4-mile radius of the property is approximately $116,000 and has grown 7.8% annually. Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 6.53% and 6.53%. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Market vacancy for comparable Data Center product stands at 2.8%, down from 3.0% two years ago. The facility is a purpose-built data center with 26 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The Pittsburgh Data Center market has experienced absorption of 2800 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 13.0% population growth over the last five years. Carrier-neutral meet-me room supports multiple fiber providers.

Site Description

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 39.39 acres and is generally level with frontage along Sunset Drive. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 12 curb cuts and the property is served by municipal water and sanitary sewer.

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 9.9 acres and is generally level with frontage along Sunset Drive. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 28 curb cuts and the property is served by municipal water and sanitary sewer.

Submarket Analysis

Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 12.2% population growth over the last five years. Carrier-neutral meet-me room supports multiple fiber providers. Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 5.23% and 5.23%. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 7.50% and 7.50%. Rent growth in the submarket has averaged 7.7% annually over the past 10 years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The Pittsburgh Data Center market has experienced absorption of 3500 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 2.3% population growth over the last five years. Median household income within a 5-mile radius of the property is approximately $314,000 and has grown 13.9% annually.

Site Description

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 20.20 acres and is generally level with frontage along Sunset Drive. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Improvements Description

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 3 stories. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition.

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. The roof is a 5-year membrane system with an estimated remaining useful life of 6 years. Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 26 stories.

Building Systems

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 18 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 10 stories. Carrier-neutral meet-me room supports multiple fiber providers. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Common area interiors have been refreshed within the last 4 years and are in average to good condition.

Canyon Saddlebrook Data Campus was originally constructed in 1973 and consists of 390,985 SF in a building of 47 stories. The roof is a 10-year membrane system with an estimated remaining useful life of 5 years. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition.

Valuation Discussion

The facility is a purpose-built data center with 31 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Debt service coverage ratio was 5.62x on a trailing basis against a covenant minimum of 1.20x. Net operating income is projected to grow at a compound annual rate of 3.1% over the hold period.

The facility is a purpose-built data center with 18 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The going-in capitalization rate of 7.30% reflects the in-place income and the stabilized occupancy assumption. Net operating income is projected to grow at a compound annual rate of 5.3% over the hold period. Management fees are calculated at 4.1% of collected revenue and are included in operating expenses. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Valuation Discussion

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The going-in capitalization rate of 5.96% reflects the in-place income and the stabilized occupancy assumption. Effective gross income for the trailing period was $388,000, representing a 12.0% increase over the prior year. Debt service coverage ratio was 5.26x on a trailing basis against a covenant minimum of 1.20x. The facility is a purpose-built data center with 13 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Management fees are calculated at 3.6% of collected revenue and are included in operating expenses. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Net operating income is projected to grow at a compound annual rate of 7.2% over the hold period. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Income and Expense Review

The going-in capitalization rate of 6.87% reflects the in-place income and the stabilized occupancy assumption. The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. The going-in capitalization rate of 8.19% reflects the in-place income and the stabilized occupancy assumption. Net operating income is projected to grow at a compound annual rate of 7.5% over the hold period. Debt service coverage ratio was 5.95x on a trailing basis against a covenant minimum of 1.20x. Carrier-neutral meet-me room supports multiple fiber providers.

Market Overview

Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 13.6% population growth over the last five years. Market vacancy for comparable Data Center product stands at 6.1%, down from 7.5% two years ago. Median household income within a 7-mile radius of the property is approximately $346,000 and has grown 8.2% annually. The facility is a purpose-built data center with 6 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Employment growth is led by healthcare, logistics, education and professional services sectors. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Rent growth in the submarket has averaged 7.4% annually over the past 10 years. Carrier-neutral meet-me room supports multiple fiber providers.

Topography and Flood Zone

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 43 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

The site contains approximately 2.2 acres and is generally level with frontage along Sunset Drive. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 39 curb cuts and the property is served by municipal water and sanitary sewer.

Supply and Demand

The facility is a purpose-built data center with 35 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Investor demand for Data Center assets in Pittsburgh remains strong with recent trades at capitalization rates between 6.09% and 6.09%. Employment growth is led by healthcare, logistics, education and professional services sectors. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 4.9% population growth over the last five years.

The facility is a purpose-built data center with 36 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Canyon Saddlebrook Data Campus is located in Pittsburgh, PA, a market that has recorded 12.7% population growth over the last five years. Employment growth is led by healthcare, logistics, education and professional services sectors. Carrier-neutral meet-me room supports multiple fiber providers.

Site Description

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 38.38 acres and is generally level with frontage along Sunset Drive. Access to the site is provided by 4 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.
