PROPERTY CONDITION ASSESSMENT

Nautilus Onyx Tower | Richmond, VA

Property	Nautilus Onyx Tower
Address	4130 Sunset Avenue, Richmond, VA 94456
Site Visit Date	December 27, 2020
Client	Keel & Compass Properties
Immediate Repairs	$12,000

Building Systems

Nautilus Onyx Tower was originally constructed in 1965 and consists of 337,986 SF in a building of 33 stories. Weighted average lease term remaining is 11 years and in-place rents average $48 per square foot, full service gross. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Mechanical systems include rooftop package units and central plant equipment of varying age. Floor plates are efficient and column-spacing supports open and private-office layouts.

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Weighted average lease term remaining is 12 years and in-place rents average $48 per square foot, full service gross. The building is served by redundant elevators, a backup generator and a high-efficiency chiller plant. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Floor plates are efficient and column-spacing supports open and private-office layouts.

Observed Conditions

Elevators were last modernized 7 years ago and are operating without deficiency. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $46,000. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 14 months.

Electrical service is adequate for current demand; select panels are nearing the end of their useful life. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 30 months. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $136,000. Elevators were last modernized 4 years ago and are operating without deficiency. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. Domestic water piping is copper and PVC with no evidence of widespread leakage.

Building Systems

Weighted average lease term remaining is 8 years and in-place rents average $48 per square foot, full service gross. Nautilus Onyx Tower was originally constructed in 1965 and consists of 337,986 SF in a building of 38 stories. The building is served by redundant elevators, a backup generator and a high-efficiency chiller plant. The roof is a 10-year membrane system with an estimated remaining useful life of 11 years. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Mechanical systems include rooftop package units and central plant equipment of varying age.

The roof is a 22-year membrane system with an estimated remaining useful life of 8 years. The building is served by redundant elevators, a backup generator and a high-efficiency chiller plant. Mechanical systems include rooftop package units and central plant equipment of varying age. Common area interiors have been refreshed within the last 4 years and are in average to good condition. Floor plates are efficient and column-spacing supports open and private-office layouts.

Recommendations

The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 10 months. Domestic water piping is copper and PVC with no evidence of widespread leakage. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $148,000.

Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 40 months. Elevators were last modernized 10 years ago and are operating without deficiency. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. Domestic water piping is copper and PVC with no evidence of widespread leakage.

Construction Details

The building is served by redundant elevators, a backup generator and a high-efficiency chiller plant. Weighted average lease term remaining is 8 years and in-place rents average $48 per square foot, full service gross. Common area interiors have been refreshed within the last 11 years and are in average to good condition. The building features a renovated lobby, structured parking at a ratio of 35 per 1,000 square feet, and a tenant lounge with fitness center. Mechanical systems include rooftop package units and central plant equipment of varying age. Floor plates are efficient and column-spacing supports open and private-office layouts.

The building is served by redundant elevators, a backup generator and a high-efficiency chiller plant. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Weighted average lease term remaining is 3 years and in-place rents average $48 per square foot, full service gross. Mechanical systems include rooftop package units and central plant equipment of varying age. The roof is a 14-year membrane system with an estimated remaining useful life of 5 years.

Recommendations

Domestic water piping is copper and PVC with no evidence of widespread leakage. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $19,000. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Elevators were last modernized 5 years ago and are operating without deficiency. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 40 months. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations.

Domestic water piping is copper and PVC with no evidence of widespread leakage. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. Elevators were last modernized 6 years ago and are operating without deficiency. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 46 months.

Building Systems

Common area interiors have been refreshed within the last 5 years and are in average to good condition. Mechanical systems include rooftop package units and central plant equipment of varying age. Nautilus Onyx Tower was originally constructed in 1965 and consists of 337,986 SF in a building of 24 stories. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The building is served by redundant elevators, a backup generator and a high-efficiency chiller plant. The building features a renovated lobby, structured parking at a ratio of 30 per 1,000 square feet, and a tenant lounge with fitness center.

Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Floor plates are efficient and column-spacing supports open and private-office layouts. Nautilus Onyx Tower was originally constructed in 1965 and consists of 337,986 SF in a building of 5 stories. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Common area interiors have been refreshed within the last 8 years and are in average to good condition.

Deferred Maintenance

The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Elevators were last modernized 8 years ago and are operating without deficiency. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 23 months. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. Electrical service is adequate for current demand; select panels are nearing the end of their useful life.

Electrical service is adequate for current demand; select panels are nearing the end of their useful life. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Domestic water piping is copper and PVC with no evidence of widespread leakage. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $253,000. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 39 months.

Improvements Description

The roof is a 32-year membrane system with an estimated remaining useful life of 11 years. Common area interiors have been refreshed within the last 3 years and are in average to good condition. Mechanical systems include rooftop package units and central plant equipment of varying age. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition.

The building features a renovated lobby, structured parking at a ratio of 18 per 1,000 square feet, and a tenant lounge with fitness center. The roof is a 46-year membrane system with an estimated remaining useful life of 5 years. Floor plates are efficient and column-spacing supports open and private-office layouts. Weighted average lease term remaining is 8 years and in-place rents average $48 per square foot, full service gross.

FICTITIOUS SAMPLE DOCUMENT — all names, figures and entities are invented for classroom training use only

Observed Conditions

The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. Elevators were last modernized 3 years ago and are operating without deficiency.

Elevators were last modernized 7 years ago and are operating without deficiency. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 19 months. Domestic water piping is copper and PVC with no evidence of widespread leakage. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations.

Recommendations

ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $185,000. Domestic water piping is copper and PVC with no evidence of widespread leakage. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 36 months. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. Elevators were last modernized 4 years ago and are operating without deficiency.

Domestic water piping is copper and PVC with no evidence of widespread leakage. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $188,000. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 9 months. Elevators were last modernized 12 years ago and are operating without deficiency.

Observed Conditions

Elevators were last modernized 8 years ago and are operating without deficiency. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $269,000. Domestic water piping is copper and PVC with no evidence of widespread leakage.

The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Domestic water piping is copper and PVC with no evidence of widespread leakage. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $312,000. Elevators were last modernized 9 years ago and are operating without deficiency.

FICTITIOUS SAMPLE DOCUMENT — all names, figures and entities are invented for classroom training use only

Construction Details

Mechanical systems include rooftop package units and central plant equipment of varying age. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The roof is a 28-year membrane system with an estimated remaining useful life of 11 years. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The building features a renovated lobby, structured parking at a ratio of 31 per 1,000 square feet, and a tenant lounge with fitness center.

Mechanical systems include rooftop package units and central plant equipment of varying age. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Weighted average lease term remaining is 6 years and in-place rents average $48 per square foot, full service gross. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The building is served by redundant elevators, a backup generator and a high-efficiency chiller plant. Nautilus Onyx Tower was originally constructed in 1965 and consists of 337,986 SF in a building of 48 stories.

Deferred Maintenance

Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $54,000. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 32 months. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. Domestic water piping is copper and PVC with no evidence of widespread leakage.

ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $331,000. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 18 months. Elevators were last modernized 10 years ago and are operating without deficiency. Electrical service is adequate for current demand; select panels are nearing the end of their useful life.

Building Systems

The building features a renovated lobby, structured parking at a ratio of 28 per 1,000 square feet, and a tenant lounge with fitness center. The building is served by redundant elevators, a backup generator and a high-efficiency chiller plant. Weighted average lease term remaining is 8 years and in-place rents average $48 per square foot, full service gross. The roof is a 15-year membrane system with an estimated remaining useful life of 3 years.

Weighted average lease term remaining is 5 years and in-place rents average $48 per square foot, full service gross. The roof is a 48-year membrane system with an estimated remaining useful life of 5 years. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Nautilus Onyx Tower was originally constructed in 1965 and consists of 337,986 SF in a building of 28 stories.

Observed Conditions

Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. Domestic water piping is copper and PVC with no evidence of widespread leakage. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $27,000. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Elevators were last modernized 6 years ago and are operating without deficiency.

Electrical service is adequate for current demand; select panels are nearing the end of their useful life. FICTITIOUS SAMPLE DOCUMENT — all names, figures and entities are invented for classroom training use only

Observed Conditions

ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $370,000. Elevators were last modernized 10 years ago and are operating without deficiency. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 39 months. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Domestic water piping is copper and PVC with no evidence of widespread leakage.

Electrical service is adequate for current demand; select panels are nearing the end of their useful life. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 20 months. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $204,000. Elevators were last modernized 6 years ago and are operating without deficiency. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations.

Observed Conditions

Elevators were last modernized 8 years ago and are operating without deficiency. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $227,000. Electrical service is adequate for current demand; select panels are nearing the end of their useful life.

Domestic water piping is copper and PVC with no evidence of widespread leakage. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $66,000. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Elevators were last modernized 11 years ago and are operating without deficiency.

Recommendations

Electrical service is adequate for current demand; select panels are nearing the end of their useful life. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $347,000. Domestic water piping is copper and PVC with no evidence of widespread leakage. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 33 months. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations.

Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 16 months. Elevators were last modernized 7 years ago and are operating without deficiency. Domestic water piping is copper and PVC with no evidence of widespread leakage. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations. Electrical service is adequate for current demand; select panels are nearing the end of their useful life.

Improvements Description

Weighted average lease term remaining is 11 years and in-place rents average $48 per square foot, full service gross. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Nautilus Onyx Tower was originally constructed in 1965 and consists of 337,986 SF in a building of 13 stories. Common area interiors have been refreshed within the last 6 years and are in average to good condition. Floor plates are efficient and column-spacing supports open and private-office layouts.

Floor plates are efficient and column-spacing supports open and private-office layouts. Mechanical systems include rooftop package units and central plant equipment of varying age. Weighted average lease term remaining is 9 years and in-place rents average $48 per square foot, full service gross. The building features a renovated lobby, structured parking at a ratio of 7 per 1,000 square feet, and a tenant lounge with fitness center.

Recommendations

The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 34 months. Elevators were last modernized 7 years ago and are operating without deficiency. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $238,000.

Domestic water piping is copper and PVC with no evidence of widespread leakage. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $184,000. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Elevators were last modernized 12 years ago and are operating without deficiency. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 36 months.

Construction Details

The building is served by redundant elevators, a backup generator and a high-efficiency chiller plant. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Floor plates are efficient and column-spacing supports open and private-office layouts. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Nautilus Onyx Tower was originally constructed in 1965 and consists of 337,986 SF in a building of 5 stories.

Floor plates are efficient and column-spacing supports open and private-office layouts. The roof is a 14-year membrane system with an estimated remaining useful life of 11 years. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The building is served by redundant elevators, a backup generator and a high-efficiency chiller plant. Common area interiors have been refreshed within the last 9 years and are in average to good condition. Nautilus Onyx Tower was originally constructed in 1965 and consists of 337,986 SF in a building of 3 stories.

Observed Conditions

Domestic water piping is copper and PVC with no evidence of widespread leakage. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 18 months. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $413,000. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Windows and exterior doors are in fair condition; sealant replacement is recommended at selected locations.

Elevators were last modernized 4 years ago and are operating without deficiency. Asphalt paving shows alligator cracking and should be sealcoated and restriped during the next 46 months. Electrical service is adequate for current demand; select panels are nearing the end of their useful life. ADA observations include non-compliant slopes at two accessible routes and signage at parking; cost to cure is estimated at $460,000. The roofing system exhibits localized ponding and sealant deterioration; spot repairs are recommended within 12 months. Domestic water piping is copper and PVC with no evidence of widespread leakage.
