APPRAISAL REPORT

Northgate Station District | Buffalo, NY

DRAFT

Subject Property	Northgate Station District
Address	3432 Maple Parkway, Buffalo, NY 44709
Property Rights Appraised	Fee Simple
Effective Date of Value	June 15, 2020
Market Value Conclusion	$139,430,000

Submarket Analysis

Market vacancy for comparable Mixed-Use product stands at 4.7%, down from 4.7% two years ago. Median household income within a 4-mile radius of the property is approximately $39,000 and has grown 13.4% annually. Employment growth is led by healthcare, logistics, education and professional services sectors. The Buffalo Mixed-Use market has experienced absorption of 1600 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

The project combines ground-floor retail and restaurant space with upper-level residential and office components. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Median household income within a 6-mile radius of the property is approximately $264,000 and has grown 13.6% annually. The property is walkable to transit, with 48 structured parking spaces shared between uses.

Site Description

The site contains approximately 28.28 acres and is generally level with frontage along Maple Parkway. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

The site contains approximately 18.18 acres and is generally level with frontage along Maple Parkway. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 46 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Supply and Demand

Median household income within a 8-mile radius of the property is approximately $106,000 and has grown 10.5% annually. The Buffalo Mixed-Use market has experienced absorption of 200 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Employment growth is led by healthcare, logistics, education and professional services sectors.

Market vacancy for comparable Mixed-Use product stands at 8.2%, down from 7.1% two years ago. The project combines ground-floor retail and restaurant space with upper-level residential and office components. The property is walkable to transit, with 6 structured parking spaces shared between uses. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Rent growth in the submarket has averaged 6.9% annually over the past 7 years.

Topography and Flood Zone

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 5 curb cuts and the property is served by municipal water and sanitary sewer. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection.

Access to the site is provided by 31 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 12.12 acres and is generally level with frontage along Maple Parkway. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Market Overview

The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Access to the site is provided by 7 curb cuts and the property is served by municipal water and sanitary sewer.

Submarket Analysis

The project combines ground-floor retail and restaurant space with upper-level residential and office components. The Buffalo Mixed-Use market has experienced absorption of 2900 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Investor demand for Mixed-Use assets in Buffalo remains strong with recent trades at capitalization rates between 6.83% and 6.83%. Northgate Station District is located in Buffalo, NY, a market that has recorded 9.1% population growth over the last five years. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis.

Northgate Station District is located in Buffalo, NY, a market that has recorded 13.4% population growth over the last five years. Market vacancy for comparable Mixed-Use product stands at 8.1%, down from 3.4% two years ago. Median household income within a 7-mile radius of the property is approximately $312,000 and has grown 6.9% annually. The Buffalo Mixed-Use market has experienced absorption of 2600 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Investor demand for Mixed-Use assets in Buffalo remains strong with recent trades at capitalization rates between 6.30% and 6.30%.

Site Description

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 35.35 acres and is generally level with frontage along Maple Parkway. Access to the site is provided by 25 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 22 curb cuts and the property is served by municipal water and sanitary sewer. The site contains approximately 5.5 acres and is generally level with frontage along Maple Parkway. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Surrounding land uses include residential, commercial and light industrial properties of similar vintage.

Submarket Analysis

Percentage rent and CAM reimbursements are tracked separately for the commercial component. Market vacancy for comparable Mixed-Use product stands at 9.7%, down from 3.4% two years ago. Median household income within a 4-mile radius of the property is approximately $326,000 and has grown 6.7% annually. Employment growth is led by healthcare, logistics, education and professional services sectors. Rent growth in the submarket has averaged 5.6% annually over the past 4 years.

Improvements Description

The project combines ground-floor retail and restaurant space with upper-level residential and office components. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Mechanical systems include rooftop package units and central plant equipment of varying age. Common area interiors have been refreshed within the last 3 years and are in average to good condition.

Common area interiors have been refreshed within the last 8 years and are in average to good condition. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The roof is a 8-year membrane system with an estimated remaining useful life of 7 years.

Building Systems

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Mechanical systems include rooftop package units and central plant equipment of varying age. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The property is walkable to transit, with 37 structured parking spaces shared between uses. Common area interiors have been refreshed within the last 12 years and are in average to good condition.

Northgate Station District was originally constructed in 1984 and consists of 365,000 SF in a building of 21 stories. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Common area interiors have been refreshed within the last 6 years and are in average to good condition. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The project combines ground-floor retail and restaurant space with upper-level residential and office components.

Construction Details

Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. Northgate Station District was originally constructed in 1984 and consists of 365,000 SF in a building of 37 stories. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition.

The property is walkable to transit, with 30 structured parking spaces shared between uses. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The roof is a 9-year membrane system with an estimated remaining useful life of 5 years. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Northgate Station District was originally constructed in 1984 and consists of 365,000 SF in a building of 28 stories. Mechanical systems include rooftop package units and central plant equipment of varying age.

Financial Analysis

Percentage rent and CAM reimbursements are tracked separately for the commercial component. Operating expenses totaled $277,000 or approximately 47.79 per square foot, with real estate taxes representing the largest line item. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. The project combines ground-floor retail and restaurant space with upper-level residential and office components. Effective gross income for the trailing period was $74,000, representing a 10.7% increase over the prior year. The property is walkable to transit, with 39 structured parking spaces shared between uses.

The property is walkable to transit, with 43 structured parking spaces shared between uses. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Management fees are calculated at 7.5% of collected revenue and are included in operating expenses. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Effective gross income for the trailing period was $165,000, representing a 2.3% increase over the prior year. Net operating income is projected to grow at a compound annual rate of 6.2% over the hold period.

Income and Expense Review

Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Operating expenses totaled $346,000 or approximately 21.17 per square foot, with real estate taxes representing the largest line item. The property is walkable to transit, with 2 structured parking spaces shared between uses. Percentage rent and CAM reimbursements are tracked separately for the commercial component.

The going-in capitalization rate of 8.15% reflects the in-place income and the stabilized occupancy assumption. The property is walkable to transit, with 39 structured parking spaces shared between uses. The project combines ground-floor retail and restaurant space with upper-level residential and office components. Net operating income is projected to grow at a compound annual rate of 5.9% over the hold period.

Operating Performance

Effective gross income for the trailing period was $74,000, representing a 13.9% increase over the prior year. Management fees are calculated at 7.1% of collected revenue and are included in operating expenses. The going-in capitalization rate of 5.37% reflects the in-place income and the stabilized occupancy assumption. Net operating income is projected to grow at a compound annual rate of 6.1% over the hold period.

Management fees are calculated at 7.0% of collected revenue and are included in operating expenses. Percentage rent and CAM reimbursements are tracked separately for the commercial component. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Net operating income is projected to grow at a compound annual rate of 7.2% over the hold period.

FICTITIOUS SAMPLE DOCUMENT — all names, figures and entities are invented for classroom training use only

Demographics and Employment

Investor demand for Mixed-Use assets in Buffalo remains strong with recent trades at capitalization rates between 6.84% and 6.84%. Rent growth in the submarket has averaged 7.2% annually over the past 9 years. Median household income within a 2-mile radius of the property is approximately $335,000 and has grown 13.1% annually. Northgate Station District is located in Buffalo, NY, a market that has recorded 12.6% population growth over the last five years. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Market vacancy for comparable Mixed-Use product stands at 10.9%, down from 5.8% two years ago.

Median household income within a 3-mile radius of the property is approximately $468,000 and has grown 13.1% annually. The property is walkable to transit, with 18 structured parking spaces shared between uses. The Buffalo Mixed-Use market has experienced absorption of 3500 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Market vacancy for comparable Mixed-Use product stands at 13.5%, down from 4.0% two years ago.

Access and Utilities

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 37.37 acres and is generally level with frontage along Maple Parkway. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Access to the site is provided by 28 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site contains approximately 25.25 acres and is generally level with frontage along Maple Parkway. Access to the site is provided by 34 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect.

Supply and Demand

Rent growth in the submarket has averaged 5.1% annually over the past 9 years. The Buffalo Mixed-Use market has experienced absorption of 900 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. The property is walkable to transit, with 22 structured parking spaces shared between uses. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. The project combines ground-floor retail and restaurant space with upper-level residential and office components.

The Buffalo Mixed-Use market has experienced absorption of 3100 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Market vacancy for comparable Mixed-Use product stands at 3.5%, down from 3.0% two years ago. Investor demand for Mixed-Use assets in Buffalo remains strong with recent trades at capitalization rates between 7.49% and 7.49%. Northgate Station District is located in Buffalo, NY, a market that has recorded 4.6% population growth over the last five years. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Access and Utilities

Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 37.37 acres and is generally level with frontage along Maple Parkway.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 32 curb cuts and the property is served by municipal water and sanitary sewer. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 24.24 acres and is generally level with frontage along Maple Parkway.

Supply and Demand

Employment growth is led by healthcare, logistics, education and professional services sectors. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. The Buffalo Mixed-Use market has experienced absorption of 200 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

Valuation Discussion

Percentage rent and CAM reimbursements are tracked separately for the commercial component. Debt service coverage ratio was 5.16x on a trailing basis against a covenant minimum of 1.20x. Operating expenses totaled $276,000 or approximately 28.96 per square foot, with real estate taxes representing the largest line item. The property is walkable to transit, with 15 structured parking spaces shared between uses. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Net operating income is projected to grow at a compound annual rate of 5.3% over the hold period.

DRAFT

Operating expenses totaled $418,000 or approximately 22.88 per square foot, with real estate taxes representing the largest line item. The property is walkable to transit, with 14 structured parking spaces shared between uses. Debt service coverage ratio was 7.79x on a trailing basis against a covenant minimum of 1.20x. Management fees are calculated at 6.0% of collected revenue and are included in operating expenses.

Valuation Discussion

Effective gross income for the trailing period was $241,000, representing a 10.8% increase over the prior year. Debt service coverage ratio was 5.73x on a trailing basis against a covenant minimum of 1.20x. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. The project combines ground-floor retail and restaurant space with upper-level residential and office components.

Management fees are calculated at 3.4% of collected revenue and are included in operating expenses. Effective gross income for the trailing period was $317,000, representing a 10.8% increase over the prior year. Debt service coverage ratio was 5.11x on a trailing basis against a covenant minimum of 1.20x. The project combines ground-floor retail and restaurant space with upper-level residential and office components.

Valuation Discussion

Debt service coverage ratio was 5.80x on a trailing basis against a covenant minimum of 1.20x. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. The project combines ground-floor retail and restaurant space with upper-level residential and office components. Management fees are calculated at 7.8% of collected revenue and are included in operating expenses. Net operating income is projected to grow at a compound annual rate of 4.6% over the hold period. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income.

The property is walkable to transit, with 13 structured parking spaces shared between uses. Debt service coverage ratio was 6.13x on a trailing basis against a covenant minimum of 1.20x. Effective gross income for the trailing period was $139,000, representing a 6.4% increase over the prior year. Management fees are calculated at 5.7% of collected revenue and are included in operating expenses. The going-in capitalization rate of 6.72% reflects the in-place income and the stabilized occupancy assumption.

Market Overview

Market vacancy for comparable Mixed-Use product stands at 11.1%, down from 7.4% two years ago. Employment growth is led by healthcare, logistics, education and professional services sectors. Investor demand for Mixed-Use assets in Buffalo remains strong with recent trades at capitalization rates between 5.41% and 5.41%. Percentage rent and CAM reimbursements are tracked separately for the commercial component. Median household income within a 3-mile radius of the property is approximately $177,000 and has grown 6.1% annually. The Buffalo Mixed-Use market has experienced absorption of 4200 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

DRAFT

The property is walkable to transit, with 34 structured parking spaces shared between uses. Employment growth is led by healthcare, logistics, education and professional services sectors. Northgate Station District is located in Buffalo, NY, a market that has recorded 9.1% population growth over the last five years. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Percentage rent and CAM reimbursements are tracked separately for the commercial component. The Buffalo Mixed-Use market has experienced absorption of 4600 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.

Site Description

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 18.18 acres and is generally level with frontage along Maple Parkway. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 9 curb cuts and the property is served by municipal water and sanitary sewer.

The site contains approximately 18.18 acres and is generally level with frontage along Maple Parkway. Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. Access to the site is provided by 24 curb cuts and the property is served by municipal water and sanitary sewer.

Supply and Demand

Median household income within a 2-mile radius of the property is approximately $265,000 and has grown 10.5% annually. Percentage rent and CAM reimbursements are tracked separately for the commercial component. The project combines ground-floor retail and restaurant space with upper-level residential and office components. Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis.

Residential units are leased on 12-month terms while the commercial component is leased on a triple net basis. Investor demand for Mixed-Use assets in Buffalo remains strong with recent trades at capitalization rates between 5.96% and 5.96%. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Market vacancy for comparable Mixed-Use product stands at 7.7%, down from 3.2% two years ago.

Topography and Flood Zone

Utilities, including electric, natural gas and telecommunications, are available to the site from the street. Access to the site is provided by 38 curb cuts and the property is served by municipal water and sanitary sewer. Surrounding land uses include residential, commercial and light industrial properties of similar vintage. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site contains approximately 30.30 acres and is generally level with frontage along Maple Parkway.

Soils are typical of the region and no evidence of unsuitable conditions was observed at the time of inspection. The site is not located within a designated 100-year floodplain according to the FEMA flood map in effect. The site contains approximately 40.40 acres and is generally level with frontage along Maple Parkway. Utilities, including electric, natural gas and telecommunications, are available to the site from the street.

Demographics and Employment

Market vacancy for comparable Mixed-Use product stands at 9.8%, down from 7.0% two years ago. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. The project combines ground-floor retail and restaurant space with upper-level residential and office components. Northgate Station District is located in Buffalo, NY, a market that has recorded 10.1% population growth over the last five years. The Buffalo Mixed-Use market has experienced absorption of 3400 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries.
