OFFERING MEMORANDUM

Falcon Data Campus | Minneapolis, MN

Property	Falcon Data Campus
Location	3771 Technology Avenue, Minneapolis, MN 24995
Property Type	Data Center
Size	202,992 SF
Year Built	1974
Offering	Unpriced - Offers Due January 31, 2022

Investor Distributions

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 17 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions.

Leasing velocity improved during the period and management expects further upward pressure on in-place rents. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. Projected levered IRR is 6.6% with an equity multiple of 1.16x over the hold period. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market.

Demographics and Employment

The facility is a purpose-built data center with 24 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Falcon Data Campus is located in Minneapolis, MN, a market that has recorded 3.5% population growth over the last five years. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Employment growth is led by healthcare, logistics, education and professional services sectors.

The facility is a purpose-built data center with 13 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Rent growth in the submarket has averaged 4.0% annually over the past 8 years. Carrier-neutral meet-me room supports multiple fiber providers. The Minneapolis Data Center market has experienced absorption of 3600 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Business Plan Progress

Distributions to investors for the quarter were paid at an annualized rate of 4.2% on contributed capital. The facility is a purpose-built data center with 7 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Projected levered IRR is 6.2% with an equity multiple of 1.16x over the hold period. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The business plan contemplates a hold period of 11 years with disposition upon achievement of target returns.

Risk Considerations

Distributions to investors for the quarter were paid at an annualized rate of 3.9% on contributed capital. The facility is a purpose-built data center with 31 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market.

Distributions to investors for the quarter were paid at an annualized rate of 4.8% on contributed capital. Carrier-neutral meet-me room supports multiple fiber providers. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Leasing velocity improved during the period and management expects further upward pressure on in-place rents.

Submarket Analysis

Market vacancy for comparable Data Center product stands at 10.4%, down from 3.2% two years ago. Employment growth is led by healthcare, logistics, education and professional services sectors. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers.

Rent growth in the submarket has averaged 3.1% annually over the past 6 years. The Minneapolis Data Center market has experienced absorption of 2600 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Falcon Data Campus is located in Minneapolis, MN, a market that has recorded 8.6% population growth over the last five years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Investor Distributions

Projected levered IRR is 12.4% with an equity multiple of 1.39x over the hold period. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 40 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Distributions to investors for the quarter were paid at an annualized rate of 3.6% on contributed capital. The business plan contemplates a hold period of 3 years with disposition upon achievement of target returns. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market.

Market Overview

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Market vacancy for comparable Data Center product stands at 8.7%, down from 4.5% two years ago.

Employment growth is led by healthcare, logistics, education and professional services sectors. Market vacancy for comparable Data Center product stands at 6.6%, down from 4.1% two years ago. The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Improvements Description

Falcon Data Campus was originally constructed in 1974 and consists of 202,992 SF in a building of 24 stories. The facility is a purpose-built data center with 3 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Common area interiors have been refreshed within the last 5 years and are in average to good condition.

Carrier-neutral meet-me room supports multiple fiber providers. The roof is a 17-year membrane system with an estimated remaining useful life of 12 years. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. Common area interiors have been refreshed within the last 7 years and are in average to good condition.

Operating Performance

Carrier-neutral meet-me room supports multiple fiber providers. Effective gross income for the trailing period was $221,000, representing a 4.4% increase over the prior year. Debt service coverage ratio was 6.99x on a trailing basis against a covenant minimum of 1.20x. The facility is a purpose-built data center with 28 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Debt service coverage ratio was 5.66x on a trailing basis against a covenant minimum of 1.20x. Management fees are calculated at 3.8% of collected revenue and are included in operating expenses. Effective gross income for the trailing period was $360,000, representing a 11.0% increase over the prior year. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Construction Details

Falcon Data Campus was originally constructed in 1974 and consists of 202,992 SF in a building of 47 stories. Life-safety systems include a fully sprinklered building, addressable fire alarm panel and emergency lighting. The structure is of wood-frame, masonry and steel-frame construction on a slab-on-grade foundation. The facility is a purpose-built data center with 27 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Mechanical systems include rooftop package units and central plant equipment of varying age. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Common area interiors have been refreshed within the last 6 years and are in average to good condition. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Exterior finishes comprise brick veneer, fiber-cement siding and aluminum storefront glazing in good condition. The roof is a 7-year membrane system with an estimated remaining useful life of 4 years.

Operating Performance

The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Debt service coverage ratio was 5.60x on a trailing basis against a covenant minimum of 1.20x. Net operating income is projected to grow at a compound annual rate of 7.2% over the hold period. Carrier-neutral meet-me room supports multiple fiber providers.

Effective gross income for the trailing period was $268,000, representing a 4.5% increase over the prior year. The going-in capitalization rate of 7.20% reflects the in-place income and the stabilized occupancy assumption. The facility is a purpose-built data center with 8 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Leasing and Marketing

Collections for the period were 92.0% of billed charges, with bad debt of 3.1% of gross potential income. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 13 additional team members. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 42 additional team members. Marketing efforts include digital listings, signage, broker outreach and a resident referral program.

Market Overview

Rent growth in the submarket has averaged 6.1% annually over the past 5 years. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Median household income within a 9-mile radius of the property is approximately $157,000 and has grown 4.1% annually. Investor demand for Data Center assets in Minneapolis remains strong with recent trades at capitalization rates between 7.12% and 7.12%.

Median household income within a 8-mile radius of the property is approximately $67,000 and has grown 7.6% annually. Market vacancy for comparable Data Center product stands at 2.3%, down from 7.7% two years ago. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Employment growth is led by healthcare, logistics, education and professional services sectors. The facility is a purpose-built data center with 30 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Leasing and Marketing

Collections for the period were 88.3% of billed charges, with bad debt of 5.3% of gross potential income. The manager completes a monthly walk of the property and submits a variance report to the owner by the 19th business day. The facility is a purpose-built data center with 29 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 33 additional team members. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Service requests are tracked through a work-order system with an average completion time of 48 hours. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. The facility is a purpose-built data center with 27 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 26 additional team members. Marketing efforts include digital listings, signage, broker outreach and a resident referral program.

Supply and Demand

Investor demand for Data Center assets in Minneapolis remains strong with recent trades at capitalization rates between 7.24% and 7.24%. Median household income within a 4-mile radius of the property is approximately $139,000 and has grown 8.2% annually. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Falcon Data Campus is located in Minneapolis, MN, a market that has recorded 13.4% population growth over the last five years. The facility is a purpose-built data center with 22 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Risk Considerations

The facility is a purpose-built data center with 20 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Projected levered IRR is 7.3% with an equity multiple of 1.25x over the hold period. Distributions to investors for the quarter were paid at an annualized rate of 3.0% on contributed capital. Carrier-neutral meet-me room supports multiple fiber providers. Leasing velocity improved during the period and management expects further upward pressure on in-place rents.

Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. The facility is a purpose-built data center with 35 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Supply and Demand

Market vacancy for comparable Data Center product stands at 8.4%, down from 6.2% two years ago. The facility is a purpose-built data center with 4 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Falcon Data Campus is located in Minneapolis, MN, a market that has recorded 3.3% population growth over the last five years. Carrier-neutral meet-me room supports multiple fiber providers. The Minneapolis Data Center market has experienced absorption of 4400 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Employment growth is led by healthcare, logistics, education and professional services sectors.

The Minneapolis Data Center market has experienced absorption of 3900 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Falcon Data Campus is located in Minneapolis, MN, a market that has recorded 7.7% population growth over the last five years. Market vacancy for comparable Data Center product stands at 13.0%, down from 4.6% two years ago. Rent growth in the submarket has averaged 5.7% annually over the past 3 years.

Investment Overview

The business plan contemplates a hold period of 4 years with disposition upon achievement of target returns. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. Distributions to investors for the quarter were paid at an annualized rate of 5.4% on contributed capital.

The facility is a purpose-built data center with 38 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Distributions to investors for the quarter were paid at an annualized rate of 6.1% on contributed capital. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Carrier-neutral meet-me room supports multiple fiber providers.

Demographics and Employment

Rent growth in the submarket has averaged 3.7% annually over the past 9 years. Median household income within a 7-mile radius of the property is approximately $400,000 and has grown 14.0% annually. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Falcon Data Campus is located in Minneapolis, MN, a market that has recorded 3.7% population growth over the last five years.
