QUARTERLY INVESTOR REPORT

Upland Technology Campus | New Orleans, LA

Investment	Upland Technology Campus
Quarter	3Q 2026
Report Date	April 11, 2025
Sponsor	Anchorage Meadow Partners
Occupancy	90.5%

Investment Overview

The facility is a purpose-built data center with 25 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The business plan contemplates a hold period of 9 years with disposition upon achievement of target returns. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market.

The facility is a purpose-built data center with 40 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. The business plan contemplates a hold period of 12 years with disposition upon achievement of target returns. Distributions to investors for the quarter were paid at an annualized rate of 5.1% on contributed capital. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Leasing and Marketing

Collections for the period were 96.5% of billed charges, with bad debt of 4.3% of gross potential income. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 22 additional team members. The manager completes a monthly walk of the property and submits a variance report to the owner by the 33th business day. The facility is a purpose-built data center with 33 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period.

Collections for the period were 92.6% of billed charges, with bad debt of 6.9% of gross potential income. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 4 additional team members. The manager completes a monthly walk of the property and submits a variance report to the owner by the 10th business day.

Investment Overview

Leasing velocity improved during the period and management expects further upward pressure on in-place rents. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 24 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Projected levered IRR is 11.5% with an equity multiple of 1.9x over the hold period.

The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. The business plan contemplates a hold period of 5 years with disposition upon achievement of target returns. Carrier-neutral meet-me room supports multiple fiber providers. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 23 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Leasing and Marketing

The manager completes a monthly walk of the property and submits a variance report to the owner by the 41th business day. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 23 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers. Collections for the period were 91.4% of billed charges, with bad debt of 7.8% of gross potential income.

Business Plan Progress

The business plan contemplates a hold period of 3 years with disposition upon achievement of target returns. Distributions to investors for the quarter were paid at an annualized rate of 3.6% on contributed capital. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions.

The facility is a purpose-built data center with 2 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers. The business plan contemplates a hold period of 3 years with disposition upon achievement of target returns. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market.

Leasing and Marketing

Collections for the period were 95.0% of billed charges, with bad debt of 6.6% of gross potential income. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 32 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The manager completes a monthly walk of the property and submits a variance report to the owner by the 7th business day. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 36 additional team members.

Carrier-neutral meet-me room supports multiple fiber providers. Service requests are tracked through a work-order system with an average completion time of 44 hours. Collections for the period were 91.5% of billed charges, with bad debt of 7.8% of gross potential income. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Business Plan Progress

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The facility is a purpose-built data center with 4 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market.

The facility is a purpose-built data center with 40 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Projected levered IRR is 12.7% with an equity multiple of 1.27x over the hold period.

Management Commentary

Carrier-neutral meet-me room supports multiple fiber providers. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 10 additional team members. Service requests are tracked through a work-order system with an average completion time of 10 hours. Marketing efforts include digital listings, signage, broker outreach and a resident referral program.

The manager completes a monthly walk of the property and submits a variance report to the owner by the 19th business day. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Carrier-neutral meet-me room supports multiple fiber providers. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 37 additional team members. Service requests are tracked through a work-order system with an average completion time of 33 hours.

Investment Overview

Carrier-neutral meet-me room supports multiple fiber providers. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. The facility is a purpose-built data center with 42 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Leasing velocity improved during the period and management expects further upward pressure on in-place rents.

Carrier-neutral meet-me room supports multiple fiber providers. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Distributions to investors for the quarter were paid at an annualized rate of 8.0% on contributed capital. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Leasing velocity improved during the period and management expects further upward pressure on in-place rents.

FICTITIOUS SAMPLE DOCUMENT — all names, figures and entities are invented for classroom training use only

Operating Performance

Management fees are calculated at 7.1% of collected revenue and are included in operating expenses. Effective gross income for the trailing period was $16,000, representing a 11.0% increase over the prior year. Carrier-neutral meet-me room supports multiple fiber providers. The facility is a purpose-built data center with 16 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Debt service coverage ratio was 7.31x on a trailing basis against a covenant minimum of 1.20x. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 46 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Submarket Analysis

Employment growth is led by healthcare, logistics, education and professional services sectors. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 29 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Market vacancy for comparable Data Center product stands at 2.2%, down from 3.0% two years ago.

Market vacancy for comparable Data Center product stands at 13.7%, down from 4.9% two years ago. Employment growth is led by healthcare, logistics, education and professional services sectors. Investor demand for Data Center assets in New Orleans remains strong with recent trades at capitalization rates between 7.95% and 7.95%. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Operating Performance

A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Debt service coverage ratio was 8.02x on a trailing basis against a covenant minimum of 1.20x. Net operating income is projected to grow at a compound annual rate of 4.7% over the hold period. Management fees are calculated at 3.0% of collected revenue and are included in operating expenses.

Net operating income is projected to grow at a compound annual rate of 5.6% over the hold period. Carrier-neutral meet-me room supports multiple fiber providers. The going-in capitalization rate of 6.22% reflects the in-place income and the stabilized occupancy assumption. The facility is a purpose-built data center with 24 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Operating expenses totaled $464,000 or approximately 24.27 per square foot, with real estate taxes representing the largest line item. Debt service coverage ratio was 5.37x on a trailing basis against a covenant minimum of 1.20x.

Submarket Analysis

New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 7 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

The facility is a purpose-built data center with 6 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Market vacancy for comparable Data Center product stands at 3.6%, down from 7.3% two years ago. Investor demand for Data Center assets in New Orleans remains strong with recent trades at capitalization rates between 5.09% and 5.09%. Employment growth is led by healthcare, logistics, education and professional services sectors.

Financial Analysis

A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Operating expenses totaled $449,000 or approximately 20.83 per square foot, with real estate taxes representing the largest line item. Carrier-neutral meet-me room supports multiple fiber providers.

A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 32 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Management fees are calculated at 5.5% of collected revenue and are included in operating expenses. Carrier-neutral meet-me room supports multiple fiber providers.

Investor Distributions

Distributions to investors for the quarter were paid at an annualized rate of 7.9% on contributed capital. The facility is a purpose-built data center with 13 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Projected levered IRR is 11.1% with an equity multiple of 1.48x over the hold period.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The business plan contemplates a hold period of 11 years with disposition upon achievement of target returns. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Projected levered IRR is 3.4% with an equity multiple of 1.23x over the hold period. The facility is a purpose-built data center with 5 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers.

Leasing and Marketing

Service requests are tracked through a work-order system with an average completion time of 35 hours. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Carrier-neutral meet-me room supports multiple fiber providers. The manager completes a monthly walk of the property and submits a variance report to the owner by the 46th business day. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 3 additional team members. Collections for the period were 91.4% of billed charges, with bad debt of 4.3% of gross potential income.

On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 38 additional team members. Collections for the period were 96.8% of billed charges, with bad debt of 6.5% of gross potential income. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. Carrier-neutral meet-me room supports multiple fiber providers.

Business Plan Progress

Projected levered IRR is 11.3% with an equity multiple of 1.18x over the hold period. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Distributions to investors for the quarter were paid at an annualized rate of 7.1% on contributed capital.

Projected levered IRR is 12.3% with an equity multiple of 1.37x over the hold period. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 34 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Leasing and Marketing

Marketing efforts include digital listings, signage, broker outreach and a resident referral program. The facility is a purpose-built data center with 37 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Collections for the period were 96.7% of billed charges, with bad debt of 6.1% of gross potential income. The manager completes a monthly walk of the property and submits a variance report to the owner by the 21th business day.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Collections for the period were 90.6% of billed charges, with bad debt of 3.4% of gross potential income. Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period.

Risk Considerations

Projected levered IRR is 8.9% with an equity multiple of 1.9x over the hold period. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Distributions to investors for the quarter were paid at an annualized rate of 7.0% on contributed capital.

The business plan contemplates a hold period of 4 years with disposition upon achievement of target returns. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. The facility is a purpose-built data center with 37 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Projected levered IRR is 10.9% with an equity multiple of 1.20x over the hold period.

Valuation Discussion

Carrier-neutral meet-me room supports multiple fiber providers. Net operating income is projected to grow at a compound annual rate of 6.5% over the hold period. The going-in capitalization rate of 5.79% reflects the in-place income and the stabilized occupancy assumption. Debt service coverage ratio was 7.35x on a trailing basis against a covenant minimum of 1.20x.

The going-in capitalization rate of 6.02% reflects the in-place income and the stabilized occupancy assumption. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The facility is a purpose-built data center with 8 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Net operating income is projected to grow at a compound annual rate of 6.5% over the hold period. Operating expenses totaled $150,000 or approximately 13.05 per square foot, with real estate taxes representing the largest line item. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Supply and Demand

Rent growth in the submarket has averaged 7.2% annually over the past 8 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Employment growth is led by healthcare, logistics, education and professional services sectors. Upland Technology Campus is located in New Orleans, LA, a market that has recorded 11.7% population growth over the last five years. The facility is a purpose-built data center with 24 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

The New Orleans Data Center market has experienced absorption of 2900 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. The facility is a purpose-built data center with 5 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Market vacancy for comparable Data Center product stands at 5.9%, down from 7.2% two years ago. Employment growth is led by healthcare, logistics, education and professional services sectors.

Income and Expense Review

Effective gross income for the trailing period was $11,000, representing a 6.2% increase over the prior year. Operating expenses totaled $223,000 or approximately 29.72 per square foot, with real estate taxes representing the largest line item. The facility is a purpose-built data center with 41 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers.

Operating expenses totaled $12,000 or approximately 27.97 per square foot, with real estate taxes representing the largest line item. The going-in capitalization rate of 5.10% reflects the in-place income and the stabilized occupancy assumption. Carrier-neutral meet-me room supports multiple fiber providers. Effective gross income for the trailing period was $77,000, representing a 7.7% increase over the prior year. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Supply and Demand

Rent growth in the submarket has averaged 7.4% annually over the past 6 years. Market vacancy for comparable Data Center product stands at 12.5%, down from 5.0% two years ago. Median household income within a 6-mile radius of the property is approximately $81,000 and has grown 2.4% annually. Investor demand for Data Center assets in New Orleans remains strong with recent trades at capitalization rates between 5.46% and 5.46%. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply.

Employment growth is led by healthcare, logistics, education and professional services sectors. Rent growth in the submarket has averaged 4.2% annually over the past 12 years. Upland Technology Campus is located in New Orleans, LA, a market that has recorded 12.7% population growth over the last five years. Market vacancy for comparable Data Center product stands at 6.6%, down from 7.3% two years ago. Median household income within a 2-mile radius of the property is approximately $424,000 and has grown 2.0% annually.

Valuation Discussion

Management fees are calculated at 5.9% of collected revenue and are included in operating expenses. The going-in capitalization rate of 6.11% reflects the in-place income and the stabilized occupancy assumption. Effective gross income for the trailing period was $24,000, representing a 6.0% increase over the prior year. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Debt service coverage ratio was 6.10x on a trailing basis against a covenant minimum of 1.20x. Management fees are calculated at 6.0% of collected revenue and are included in operating expenses. The facility is a purpose-built data center with 25 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Effective gross income for the trailing period was $330,000, representing a 5.1% increase over the prior year. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost.

Risk Considerations

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The business plan contemplates a hold period of 6 years with disposition upon achievement of target returns. Carrier-neutral meet-me room supports multiple fiber providers. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions.

Carrier-neutral meet-me room supports multiple fiber providers. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. The business plan contemplates a hold period of 8 years with disposition upon achievement of target returns. The facility is a purpose-built data center with 13 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Management Commentary

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. The facility is a purpose-built data center with 38 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 13 additional team members.

The facility is a purpose-built data center with 11 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Service requests are tracked through a work-order system with an average completion time of 18 hours. Carrier-neutral meet-me room supports multiple fiber providers. Collections for the period were 88.9% of billed charges, with bad debt of 5.4% of gross potential income.

Risk Considerations

Distributions to investors for the quarter were paid at an annualized rate of 4.8% on contributed capital. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. The facility is a purpose-built data center with 6 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers.

The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Carrier-neutral meet-me room supports multiple fiber providers. Distributions to investors for the quarter were paid at an annualized rate of 3.8% on contributed capital.

Leasing and Marketing

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Service requests are tracked through a work-order system with an average completion time of 22 hours. Carrier-neutral meet-me room supports multiple fiber providers.

Report generated 04/11/2025. Figures are unaudited and subject to change.

FICTITIOUS SAMPLE DOCUMENT — all names, figures and entities are invented for classroom training use only

Operating Performance

The facility is a purpose-built data center with 5 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Carrier-neutral meet-me room supports multiple fiber providers. Management fees are calculated at 3.3% of collected revenue and are included in operating expenses.

Carrier-neutral meet-me room supports multiple fiber providers. Net operating income is projected to grow at a compound annual rate of 5.1% over the hold period. Management fees are calculated at 4.4% of collected revenue and are included in operating expenses. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Submarket Analysis

Carrier-neutral meet-me room supports multiple fiber providers. The New Orleans Data Center market has experienced absorption of 3100 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Market vacancy for comparable Data Center product stands at 5.7%, down from 7.3% two years ago. Investor demand for Data Center assets in New Orleans remains strong with recent trades at capitalization rates between 6.32% and 6.32%. Rent growth in the submarket has averaged 7.7% annually over the past 9 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

The New Orleans Data Center market has experienced absorption of 2800 thousand square feet or equivalent units over the trailing twelve months, outpacing new deliveries. Employment growth is led by healthcare, logistics, education and professional services sectors. The facility is a purpose-built data center with 22 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Valuation Discussion

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Operating expenses totaled $390,000 or approximately 42.48 per square foot, with real estate taxes representing the largest line item. Management fees are calculated at 6.7% of collected revenue and are included in operating expenses. The facility is a purpose-built data center with 4 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Carrier-neutral meet-me room supports multiple fiber providers.

Operating expenses totaled $54,000 or approximately 44.20 per square foot, with real estate taxes representing the largest line item. The going-in capitalization rate of 6.93% reflects the in-place income and the stabilized occupancy assumption. The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Net operating income is projected to grow at a compound annual rate of 4.8% over the hold period. Management fees are calculated at 7.7% of collected revenue and are included in operating expenses.

Demographics and Employment

Median household income within a 7-mile radius of the property is approximately $344,000 and has grown 12.9% annually. Market vacancy for comparable Data Center product stands at 7.2%, down from 5.0% two years ago. The facility is a purpose-built data center with 30 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Employment growth is led by healthcare, logistics, education and professional services sectors.

Rent growth in the submarket has averaged 5.9% annually over the past 8 years. New construction starts have decelerated due to higher financing costs and tighter lending standards, which supports the existing supply. Employment growth is led by healthcare, logistics, education and professional services sectors. Carrier-neutral meet-me room supports multiple fiber providers. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. Market vacancy for comparable Data Center product stands at 13.7%, down from 3.5% two years ago.

Financial Analysis

Effective gross income for the trailing period was $126,000, representing a 4.9% increase over the prior year. Carrier-neutral meet-me room supports multiple fiber providers. Net operating income is projected to grow at a compound annual rate of 5.7% over the hold period. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Management fees are calculated at 6.0% of collected revenue and are included in operating expenses.

Effective gross income for the trailing period was $252,000, representing a 3.4% increase over the prior year. A reserve for replacements of $250 per unit has been underwritten in the cash flow below net operating income. Debt service coverage ratio was 5.31x on a trailing basis against a covenant minimum of 1.20x. Net operating income is projected to grow at a compound annual rate of 3.3% over the hold period.

Supply and Demand

Market vacancy for comparable Data Center product stands at 5.4%, down from 6.7% two years ago. Employment growth is led by healthcare, logistics, education and professional services sectors. Rent growth in the submarket has averaged 5.0% annually over the past 4 years. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Upland Technology Campus is located in New Orleans, LA, a market that has recorded 13.9% population growth over the last five years.

Investor Distributions

Key risks include interest rate exposure, tenant rollover, construction cost overruns and local supply additions. The business plan contemplates a hold period of 8 years with disposition upon achievement of target returns. Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Distributions to investors for the quarter were paid at an annualized rate of 6.8% on contributed capital.

The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Distributions to investors for the quarter were paid at an annualized rate of 3.9% on contributed capital. The facility is a purpose-built data center with 18 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Projected levered IRR is 5.2% with an equity multiple of 1.37x over the hold period. Carrier-neutral meet-me room supports multiple fiber providers. The business plan contemplates a hold period of 12 years with disposition upon achievement of target returns.

Leasing and Marketing

Carrier-neutral meet-me room supports multiple fiber providers. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. The facility is a purpose-built data center with 20 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Service requests are tracked through a work-order system with an average completion time of 40 hours. Collections for the period were 90.2% of billed charges, with bad debt of 5.5% of gross potential income. The manager completes a monthly walk of the property and submits a variance report to the owner by the 27th business day.

Marketing efforts include digital listings, signage, broker outreach and a resident referral program. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 45 additional team members. Service requests are tracked through a work-order system with an average completion time of 47 hours. The facility is a purpose-built data center with 18 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. Carrier-neutral meet-me room supports multiple fiber providers.

Investment Overview

The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Projected levered IRR is 7.3% with an equity multiple of 1.43x over the hold period. Carrier-neutral meet-me room supports multiple fiber providers. The business plan contemplates a hold period of 10 years with disposition upon achievement of target returns. Leasing velocity improved during the period and management expects further upward pressure on in-place rents. Distributions to investors for the quarter were paid at an annualized rate of 6.7% on contributed capital.

Tenants are billed per kilowatt of contracted capacity with power pass-through at metered cost. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Distributions to investors for the quarter were paid at an annualized rate of 4.7% on contributed capital. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter. Carrier-neutral meet-me room supports multiple fiber providers.

Property Operations

Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. On-site staffing consists of a property manager, assistant manager, maintenance supervisor and 38 additional team members. Service requests are tracked through a work-order system with an average completion time of 30 hours. The facility is a purpose-built data center with 14 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. On-site infrastructure includes diesel generators, UPS systems, CRAC units and a biometric-controlled security perimeter.

Marketing efforts include digital listings, signage, broker outreach and a resident referral program. Service requests are tracked through a work-order system with an average completion time of 8 hours. Preventive maintenance schedules for HVAC, elevators and life-safety systems were completed on time during the period. The facility is a purpose-built data center with 37 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds.

Risk Considerations

The business plan contemplates a hold period of 6 years with disposition upon achievement of target returns. The facility is a purpose-built data center with 29 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. Distributions to investors for the quarter were paid at an annualized rate of 7.5% on contributed capital. Leasing velocity improved during the period and management expects further upward pressure on in-place rents.

Distributions to investors for the quarter were paid at an annualized rate of 4.0% on contributed capital. The facility is a purpose-built data center with 24 MW of critical IT load, N+1 power and cooling redundancy, and dual utility feeds. The investment thesis is based on stabilizing occupancy, completing the capital plan and capturing rent growth to market. Projected levered IRR is 6.4% with an equity multiple of 1.10x over the hold period.
